Cette étude a été élaborée pour compléter une suite de trois outils d'enquête évaluant les soins de santé de première ligne dans le cadre du Projet d'étude des soins de santé de première ligne de l'ICIS. Elle a été effectuée afin de soutenir l'élaboration d'un questionnaire mesurant les caractéristiques organisationnelles des soins de santé de première ligne au Canada.

REMERCIEMENTS

Cette étude de repérage sur la mesure des caractéristiques organisationnelles des soins de santé de première ligne n'aurait pas été possible sans le soutien de plusieurs experts dans le domaine. Tout d'abord, nous tenons à souligner la contribution des experts consultés. Pour plus de détails sur ces experts, voir l'annexe 3.

Des remerciements doivent aussi être transmis à mesdames Cathie Scott, Audrey Couture et Jeannie Haggerty, ainsi qu'aux docteurs Sabrina Wong, Raynald Pineault, Bill Hogg, Sharon Johnston, Alan Katz, Rick Glazier et Fred Burge qui ont commenté certaines sections de ce rapport ou le questionnaire qui en découle pour identifier les caractéristiques organisationnelles. Les observations et commentaires de chacun de nos réviseurs ont grandement contribué aux résultats de ce travail. Leurs apports ont été particulièrement utiles dans l'élaboration du questionnaire organisationnel.

Nous tenons aussi à remercier tout particulièrement madame Danièle Francoeur pour son soutien dans l'élaboration de cette étude.

Nous tenons aussi à exprimer notre reconnaissance envers le personnel de l'Institut canadien d'information sur la santé (ICIS) en particulier Ali Moses McKeag, Brenda Tipper et Greg Webster pour leur soutien dans le cadre de ce projet.

1 INTRODUCTION

1.1 CONTRIBUTION DES ORGANISATIONS DE SOINS DE SANTÉ DE PREMIÈRE LIGNE AU RENDEMENT DES SYSTÈMES DE SANTÉ

Afin d'améliorer l'accès aux soins de santé, les décideurs se sont investis dans la réforme de l'organisation, du financement et de la prestation des soins de santé de première ligne¹ (Broemeling et collab., 2006; Wong et collab., 2011). Il s'agit d'une orientation qui fait suite aux recommandations de divers comités provinciaux, ainsi qu'à la publication du rapport de la Commission Romanow en 2002 (Jaakkimainen 2011). Il est désormais reconnu que les systèmes axés sur les soins de santé de première ligne améliorent la santé globale des populations (Starfield et collab., 2005; OMS 2008; Jaakkimainen et collab., 2011). On s'attend donc à ce que la réforme des organisations de soins de santé de première ligne permette à la clientèle de ces organisations de vivre une meilleure expérience de soins axée sur l'accessibilité des services, la continuité, l'efficacité, la sécurité, l'intégralité des soins et ainsi que sur la réactivité des organisations (Starfield et collab., 2005; OMS 2008; Sutherland et Coyle 2009).

Il est important de reconnaître qu'au cours des dernières années les organisations de soins de santé de première ligne au Canada ont, de façon constante, considérablement évolué (Strumpf et collab., 2012; Hutchison et collab., 2011; Broemeling et collab., 2006). En matière de prestation de services, les réformes qui ont été mises en place dans toutes les provinces du Canada ont engendré différents modèles organisationnels de soins de santé de première ligne (Cook et Kachala 2004; Strumpf et collab., 2012). L'adoption de certains de ces modèles a eu des répercussions positives sur la qualité des soins de santé (Hutchison et collab., 2011; Levesque et collab., 2010; Haggerty et collab., 2004; Broemeling et collab., 2006).

L'évaluation organisationnelle des soins de santé de première ligne est un domaine en constante évolution qui doit tenir compte de la complexité de l'environnement de chaque organisation de soins de santé de première ligne. L'étendue et la diversité des réformes dans ce domaine démontrent l'importance de concevoir des outils standardisés qui permettent aux chercheurs de recueillir des renseignements pertinents et comparables dans différents contextes.

1.2 ÉLABORATION D'UN OUTIL DE MESURE DESTINÉ À L'ÉVALUATION DES ORGANISATIONS DE SOINS DE SANTÉ DE PREMIÈRE LIGNE

L'Institut canadien d'information sur la santé (ICIS) a piloté l'élaboration d'une série de trois outils de mesure portant sur l'évaluation de l'organisation des soins de santé de première ligne, les prestataires de soins et les patients. Ces outils sont basés sur les pratiques organisationnelles. Ils peuvent être utilisés pour mesurer la qualité des soins de santé de première ligne et évaluer l'organisation et la prestation des soins de santé de première ligne. La présente étude de repérage fait partie du projet d'étude des soins de santé de première

¹ Tout au long de ce document, l'expression « soins de santé de première ligne » comprend également les services offerts en première ligne.

ligne de l'ICIS. Elle a été effectuée dans le but de soutenir l'élaboration du questionnaire portant sur l'organisation des soins de santé de première ligne. Ce questionnaire devait permettre d'évaluer l'organisation et la prestation des soins de santé de première ligne partout au Canada. Jusqu'à présent, « la recherche sur les soins de santé première ligne menée au Canada n'a pas été pleinement exploitée » (McMurchy 2009).

En lien avec ce constat, la présente étude a pour but de faciliter la recherche sur les soins de santé de première ligne en exposant la démarche qui a mené à l'élaboration d'un questionnaire conçu pour mesurer les caractéristiques organisationnelles des soins de santé de première ligne. Ce questionnaire développé dans le cadre du projet de l'ICIS diffère des deux autres outils complémentaires qui, eux, évaluent les pratiques liées au prestataire de services ainsi que l'expérience vécue par le patient. En effet, le questionnaire portant sur les caractéristiques organisationnelles offre la possibilité d'être adapté de manière à pouvoir être utilisé dans une grande variété de contextes de soins de santé de première ligne. « La qualité des soins de santé est un concept aux multiples facettes, et l'évaluation de nombreuses perspectives différentes est nécessaire pour la mesurer » (Wong et collab. 2008).

Une meilleure compréhension des caractéristiques organisationnelles de soins de santé de première ligne est importante pour orienter les réformes à venir et évaluer les répercussions des innovations implantées dans différents contextes.

« Les pratiques de première ligne, y compris la médecine familiale et, dans quelques contextes, la médecine interne générale, ainsi que les pratiques pédiatriques sont uniques parmi les prestataires de soins de santé, en ce sens qu'elles constituent la porte d'entrée de nombreux patients aux besoins multiples en matière de soins de santé, de la prévention à l'identification des maladies, en passant par le traitement des malaises et la référence aux spécialistes » (Ohman-Strickland et collab. 2007).

1.3 LE PRÉSENT RAPPORT

Cette étude de repérage revêt une certaine importance dans un contexte où il ne se fait que peu de recherche pour mesurer les caractéristiques organisationnelles des modèles de prestation des soins de santé de première ligne. Étant donné les changements constants auxquels font face les organisations de santé de première ligne, cette étude répond à un réel besoin. Par conséquent, nous avons répertorié les outils de mesure disponibles à l'échelle internationale, conçu une grille de classification des différentes caractéristiques organisationnelles mesurées par les outils recensés, classé les items couverts par ces différents outils et analysé la couverture en fonction des différentes caractéristiques organisationnelles pour chacun de ces outils. Nous avons ainsi retenu 19 questionnaires portant sur l'organisation de soins de santé de première ligne. À partir de ces questionnaires, nous avons créé une base de données complète en classifiant les questions en fonction de différentes caractéristiques organisationnelles. Les questions les plus pertinentes pour évaluer l'organisation et la prestation des soins de santé de première ligne ont été sélectionnées afin de concevoir un questionnaire organisationnel détaillé qui, nous l'espérons, sera largement adopté, de façon à ce que les travaux effectués par différents chercheurs puissent être comparés.

2 OBJECTIFS DE L'ÉTUDE DE REPÉRAGE

Cette étude a pour but de brosser un portrait global des principaux items repérés dans différents questionnaires. Les trois principales étapes de cette étude de repérage sont :

1. d'identifier les questionnaires et les outils existants qui mesurent les caractéristiques organisationnelles des soins de santé de première ligne;
2. d'élaborer un système de classification qui permet de regrouper et d'organiser les caractéristiques organisationnelles des soins de santé de première ligne à la lumière des travaux pertinents ayant été effectués dans ce domaine;
3. de classer les questions et les items pertinents dans le système de classification élaboré.

Le but final de l'étude était d'élaborer un questionnaire permettant d'évaluer les caractéristiques organisationnelles et la prestation des soins de santé de première ligne.

3 MÉTHODOLOGIE

3.1 LA RECENSION DES OUTILS DE MESURE

Cette étude de repérage a été basée essentiellement sur une revue de la littérature scientifique et de la littérature grise ainsi que sur une consultation auprès d'experts. Afin de repérer les différents questionnaires et outils de mesure qui ont porté sur l'objet de l'étude, nous avons utilisé les bases de données de PubMed et 360 Search².

Les expressions et mots clés ci-dessous ont été utilisés afin de repérer une vaste gamme de documents :

- Modèles de soins de santé
- Soins de santé de première ligne
- Études sur les soins de santé
- Centres de santé communautaire/Organisation et administration
- Études transversales
- Accessibilité des services de santé
- Modèles organisationnels
- Innovation organisationnelle
- Soins de santé de première ligne/Organisation et administration
- Soins de santé de première ligne/Normes
- Questionnaires
- Évaluation des résultats et des procédures (soins de santé)/Organisation et administration
- Soins axés sur les patients/Organisation et administration
- Qualité des soins de santé/Organisation et administration

Une fois cette étape franchie, une méthode de sondage en boule de neige a été utilisée afin de trouver des outils pertinents supplémentaires. Cette méthode implique la consultation directe auprès de divers auteurs, puisque la plupart des questionnaires repérés dans les études extraites des bases de données n'étaient pas publiés. Ainsi, beaucoup d'auteurs³ nous ont orientés vers la source d'autres outils. À la fin de cette étape de l'étude, la revue de littérature portait principalement sur du matériel publié ou non à l'échelle nationale ou internationale. Par la suite, chaque outil de mesure repéré a été révisé afin de s'assurer qu'il mesurait bien des aspects de l'organisation et de la prestation des soins de santé de première ligne. De plus, l'outil devait avoir été conçu pour être rempli par le gestionnaire ou le médecin responsable de l'organisation des soins de santé de première ligne (par exemple : clinique médicale) ; notre intérêt, rappelons-le, était d'évaluer l'organisation générale et la prestation des soins de santé plutôt que l'aspect clinique des soins de santé de première ligne. Enfin, signalons que les questionnaires publiés en langues française et anglaise ont été pris en considération, que seuls les questionnaires accessibles au grand public ont été retenus et que trois questionnaires pour lesquels des frais d'accès étaient

² Un outil de métarecherche employé à l'Institut national de santé publique du Québec.

³ Les auteurs ayant contribué à nos travaux sont mentionnés dans l'annexe 3.

exigés ont été rejetés. Au final, 19 questionnaires ont été retenus selon les critères présentés plus haut.

3.2 LA CLASSIFICATION

Les items de chacun des questionnaires retenus ont été consignés dans un tableau présenté à l'annexe 2. Un système de classification des caractéristiques organisationnelles des soins de santé de première ligne a d'abord été élaboré pour faciliter le traitement des items présents dans chaque questionnaire. Un assistant de recherche a classé les questions et les items de chacun des 19 questionnaires selon des catégories de caractéristiques organisationnelles des soins de santé de première ligne (tableau 2). Après cette première attribution des questions et des items aux catégories, trois observateurs indépendants ont évalué l'exactitude de cette attribution. Les classements ont été adaptés de façon itérative jusqu'à l'obtention d'un accord consensuel entre les observateurs.

4 RÉSULTATS

Au cours de la revue de la littérature, nous avons trouvé de nombreuses études qui visaient à évaluer les caractéristiques organisationnelles des soins de santé de première ligne. Au total, 19 outils ont été retenus parmi ces études et présentés ci-dessous dans le tableau 1⁴. Chacun des questionnaires était présenté sous une forme différente, en fonction des objectifs de recherche, et variait également selon les caractéristiques organisationnelles couvertes : ressources humaines, financières, techniques, matérielles, organisation de la clinique, etc. La plupart des outils retenus ont été conçus pour mesurer certaines caractéristiques organisationnelles de soins de santé de première ligne, ou encore pour décrire l'expérience des médecins dans différents types d'organisations de soins de santé de première ligne. L'évaluation de la qualité des soins fournis aux patients ainsi que le rendement des organisations de soins de première ligne figuraient également parmi les thèmes récurrents dans les 19 questionnaires.

Tableau 1 Résultats de l'étude de repérage des questionnaires

Origine	Nom de l'étude/Projet	Acronyme	Nombre de formulaires	Nombre d'items	Répondant ^a

⁴ Pour une présentation détaillée des outils de mesure retenus, consultez l'annexe 1.

Tableau 1 Résultats de l'étude de repérage des questionnaires (suite)

Origine	Nom de l'étude/Projet	Acronyme	Nombre de formulaires	Nombre d'items	Répondant
États-Unis (suite)	Methods for evaluating practice change toward a patient-centered medical home	TransforMED	5	273	OSSPL
	National Study of Physician Organizations and the Management of Chronic Illness II	NSPOII	2	443	OSSPL
Canada	National Family Physician Workforce Survey	NFPWS 2001	1	52	PS
	Sondage national des médecins	NPS2010	1	39	PS
Ontario (Canada)	Comparison of Models of Primary Health Care in Ontario	COMP-PC	1	20	OSSPL
	Improving Measurement for Evaluation in Primary Health Care	IMEPHC	1	20	OSSPL
Québec (Canada)	Continuity of Primary Care in Quebec	CPCQ	3	85	OSSPL et PS
	Assessing the evolution of primary healthcare organizations and their performance	Évolution	1	65	OSSPL
	Clinicians' perception of organizational readiness for change	CPORC	1	36	Personnel 1 ^{re} ligne
Nouvelle-Écosse (Canada)	Primary Care Organization Survey	PCOS-NS	2	97	OSSPL

Les questionnaires retenus variaient en longueur, soit de 20 à 85 questions généralement et jusqu'à plus de 250 questions dans le cas de deux questionnaires. Ils variaient également selon le répondant ciblé : la plupart des questionnaires devaient être remplis par le principal acteur de l'organisation de soins de santé de première ligne (gestionnaire, médecin ou infirmière-chef), quelques-uns s'adressaient à plusieurs professionnels de la santé.

Les 19 questionnaires retenus ont tous été conçus pour évaluer des caractéristiques organisationnelles des soins de santé de première ligne. Les zones géographiques couvertes par chaque questionnaire variaient également d'une étude à l'autre, soit internationale⁵, nationale⁶ ou régionale⁷.

⁵ ISPCD = 11 pays, QUALICOPC = 34 pays.

⁶ BEACH, NatMedCa, IDCP2D, NAMCS, TransforMED, NSPOII, NFPWS 2001, et NPS 2010.

⁷ SOAPC, PCPSS, PPQCS, Evolution, COMP-PC, IMEPHC, CPCQ, CPORC et PCOS-NS.

Dans la plupart des cas, les questionnaires étaient envoyés en format imprimé aux répondants et certains étaient disponibles en format électronique. D'autres questionnaires ont été remplis par entrevue téléphonique. Selon les types de question, différentes modalités de réponse étaient proposées (échelle de réponses, à développement court ou à choix multiples) et couvraient à la fois des thèmes spécifiques et généraux. La moitié des questionnaires sélectionnés ont été utilisés au Canada.

Finalement, certaines études comprenaient un aspect longitudinal et prenaient appui sur une collecte de données répétée à différents moments de l'étude afin d'obtenir une plus grande compréhension de l'organisation des soins de santé de première ligne (Évolution : 2005 et 2010; BEACH : tous les ans depuis 1998; NAMCS : annuellement de 1973 à 1981, une fois en 1985, annuellement depuis 1989; NSPOII : janvier 2000 et juillet 2007; NFPWS 2001 : en 1997 et en 2001; NPS 2010 : en 2004, en 2007 et en 2010).

4.1 DÉFINIR LES CARACTÉRISTIQUES ORGANISATIONNELLES

Dans le cadre de notre étude, nous avons utilisé différents systèmes de classification des caractéristiques organisationnelles qui ont fait l'objet d'une publication au Canada. Haggerty et collab. (2007) ont proposé 25 caractéristiques de soins de santé de première ligne à prendre en considération dans l'évaluation des organisations de soins de santé de première ligne sur la base d'une consultation auprès d'experts. Ces caractéristiques ont été regroupées par les auteurs en cinq catégories : les caractéristiques de la pratique clinique, les dimensions structurelles de la pratique, les éléments axés sur la personne, les éléments axés sur la communauté et les dimensions liées au rendement du système. Enfin, cinq caractéristiques spécifiques aux soins de santé de première ligne ont été identifiées et intégrées dans ce système de classification : accessibilité/premier contact, continuité relationnelle, soins axés sur la famille, équipe intersectorielle et cheminement de la population.

Notre travail de définition des caractéristiques organisationnelles a également été inspiré par Hogg et collab. (2008). Cette équipe a élaboré un cadre conceptuel pour faciliter la mesure du rendement dans un système de soins de santé de première ligne. Ce cadre conceptuel renvoie à deux domaines jugés complémentaires : la structure et le rendement.

« Le domaine structurel comprend le système de soins de santé, le contexte de pratique et l'organisation de la pratique pouvant concerner les activités de toute organisation de soins de première ligne. Le domaine du rendement comprend les caractéristiques de la prestation des soins de santé et la qualité des soins cliniques d'un point de vue technique. » (Hogg et collab. 2008).

Par la suite, nous avons adapté nos premières classifications afin d'inclure les dimensions présentes dans les questionnaires retenus qui complétaient celles couvertes par les deux cadres conceptuels mentionnés ci-dessus. Comme certains questionnaires étaient élaborés en tenant compte des caractéristiques particulières à un contexte de soins de santé de première ligne, il nous apparaissait important d'en tenir compte dans l'élaboration de notre système de classification. Par exemple, le questionnaire du projet Évolution (Pineault et collab. 2012) était basé sur quatre aspects organisationnels utilisés pour décrire les

organisations de soins de santé de première ligne : la vision, les ressources, la structure organisationnelle et les pratiques. La vision renvoie aux croyances, aux valeurs et aux objectifs partagés par les intervenants. Les ressources réfèrent à la gamme et à la disponibilité des ressources (humaines et matérielles). La structure organisationnelle renvoie à la législation, aux règlements et à la gouvernance. Finalement, les pratiques sont associées à la prestation de services et aux domaines d'application des activités de la clinique (Levesque et collab. 2010; Lamarche et collab. 2003).

Notre démarche d'identification des différentes caractéristiques organisationnelles nous a permis de repérer de nombreux concepts utiles pour décrire et évaluer l'organisation, la prestation de services et le rendement des organisations de soins de santé de première ligne. Le tableau 2 illustre la classification des caractéristiques organisationnelles identifiées tout en fournissant une brève définition pour chacune. Au total, notre classification comprend 23 catégories de caractéristiques organisationnelles des soins de santé de première ligne, réparties en sept sections principales :

- identification de l'organisation;
- vision organisationnelle;
- ressources organisationnelles;
- structures organisationnelles;
- prestation de services et pratiques cliniques;
- rendement et résultats organisationnels;
- contexte organisationnel.

Le système de classification présenté dans le tableau ci-dessous constitue un des résultats principaux de notre étude de repérage. Il est le fondement de la classification des items des questionnaires retenus pour l'analyse que nous présentons plus loin dans ce document.

Tableau 2 Système de classification des caractéristiques organisationnelles des soins de santé de première ligne

Section	Catégorie	Définition
Identification de l'organisation	Répondant	Cette catégorie comprend les items liés à l'identification du répondant (nom, sexe, âge, titre/fonction, etc.).
	Lieu	Le lieu comprend l'adresse, la ville et le type de milieu de travail.
	Historique et évolution de la clinique	Les items liés à l'historique et à l'évolution de la clinique, y compris les détails comme l'âge de la clinique et les facteurs associés à sa croissance et à son développement.
Vision organisationnelle	Orientation	L'orientation de la clinique renvoie au système de valeurs et aux idéologies prédominantes qui orientent les actions, la prise de décisions et les priorités de l'organisation.
	Mission	Cette catégorie est liée aux buts et aux objectifs prédominants de la clinique et du personnel à l'égard de leur travail. Les objectifs spécifiques y sont mis en évidence.
	Responsabilité et imputabilité	Cette catégorie comprend les renseignements sur la responsabilité et l'imputabilité de l'organisation auprès des institutions professionnelles et des corps gouvernementaux compétents, de même que la santé de la communauté et le système global de soins de santé.
Ressources organisationnelles	Ressources humaines	Cette catégorie comprend les aspects reliés à la composition et à l'implication du personnel de la clinique. Les détails concernant le nombre de professionnels de la santé, le nombre d'heures travaillées par semaine, de même que l'âge, le sexe, le milieu de travail et les fonctions occupées par les divers membres du personnel font également partie des items pris en considération.
	Ressources économiques	Les ressources économiques de la clinique renvoient aux sources et aux montants de financement reçus. Les détails concernant le budget d'exploitation de la clinique et les dépenses courantes font également partie de cette catégorie. Signalons que l'information sur la façon dont les ressources économiques sont attribuées dans l'organisation (par exemple : les mesures incitatives financières) est prise en considération dans la « gouvernance » et les « mécanismes de financement » présentés plus loin.
	Ressources techniques	Dans cette catégorie, les ressources techniques de l'organisation sont documentées par la disponibilité et l'accès à différents équipements médicaux (par exemple : salles d'examen, équipement diagnostique) ainsi que par les technologies de l'information. Les renseignements liés à l'utilisation de ces ressources sont également inclus dans cette section.

Tableau 2 Système de classification des caractéristiques organisationnelles des soins de santé de première ligne (suite)

Section	Catégorie	Définition
Structures organisationnelles	Gouvernance et structure administrative	Tous les enjeux liés à la gestion sont regroupés dans cette catégorie. La propriété, la structure organisationnelle verticale et horizontale, les processus de prise de décisions, les politiques administratives et les structures opérationnelles de la clinique (par exemple : le système de prise de rendez-vous) se retrouvent dans cette catégorie. Les aspects relatifs au leadership, à l'intégration dans la communauté, plus particulièrement l'implication du patient et des membres de la communauté dans la planification stratégique des soins de santé, de même que les autorités organisationnelles, régionales et locales en matière de santé figurent également dans la catégorie de la gouvernance.
	Mécanismes de financement	Dans cette catégorie se retrouve la description des méthodes utilisées pour répartir les ressources entre les intervenants, de façon à répondre aux exigences et aux objectifs gouvernementaux. On y retrouve également l'information sur la rémunération (salaires, honoraires, capitation, contrats, etc.), les mesures incitatives, les subventions et autres modalités.
	Procédures cliniques	Les procédures cliniques se définissent comme les structures mises en place pour gérer les décisions cliniques. Les détails concernant la répartition du travail entre les médecins, les mécanismes de prise de décisions cliniques, les modèles d'organisation des services, de même que les stratégies de partage de l'information, de collaboration, de coordination et d'intégration (par exemple : les discussions concernant les cas légaux, un guide de pratiques cliniques, etc.) se retrouvent dans cette catégorie.
	Mécanismes d'amélioration de la qualité et de la sécurité du patient	L'existence de procédures de contrôle et d'amélioration de la qualité, comme l'évaluation des résultats et de la satisfaction, la formation professionnelle continue, les initiatives d'amélioration de la qualité, l'application de modèles d'amélioration continue (par exemple : PDSA, LEAN, etc.), de même que les mécanismes mis en place pour assurer la sécurité du patient (procédures de collecte et de suivi des plaintes, implantation de guide de pratique, conciliation des médicaments, mécanismes d'imputabilité, etc.), sont des aspects importants de la structure organisationnelle et sont documentés dans cette catégorie.
Prestation de services et pratiques cliniques	Horaires et heures d'ouverture	L'accessibilité des soins de santé pendant (et après) les heures d'ouverture de la clinique est abordée ici par la capacité de la clinique à assurer la disponibilité de professionnels de la santé (services sur rendez-vous et sans rendez-vous).
	Types et gamme de services offerts	On retrouve dans cette catégorie une liste exhaustive des services offerts par la clinique. L'objectif de cet exercice est de brosser le portrait de la diversité et de l'étendue des activités de soins de santé fournis en clinique.
	Gestion de maladies spécifiques	Cette catégorie comprend les détails au sujet des services fournis pour la prévention, le dépistage et le traitement de certains types de problèmes particuliers. Des programmes spéciaux, comme ceux portant sur la gestion des problèmes de santé mentale, de dépendances et d'autres maladies chroniques, sont documentés ici.

Tableau 2 Système de classification des caractéristiques organisationnelles des soins de santé de première ligne (suite)

Section	Catégorie	Définition
Prestation de services et pratiques cliniques (suite)	Degré d'intégration	<p>Cette catégorie comprend l'importance de l'échange d'information, de la collaboration, de la coordination et de l'intégralité dans l'adaptation du traitement au patient tout au long des soins qui lui sont prodigués.</p> <p>« L'échange d'information » renvoie au niveau de communication entre les intervenants tout au long des soins prodigués au patient.</p> <p>Le terme « collaboration » renvoie spécifiquement à l'importance du travail d'équipe entre les omnipraticiens, les spécialistes et les autres professionnels de la santé afin d'offrir des soins optimaux aux patients.</p> <p>La coordination concerne la prestation et l'organisation d'une combinaison de services et d'information grâce auxquels les intervenants peuvent répondre aux besoins des patients en matière de santé.</p> <p>L'« intégralité » est la caractéristique d'une offre de service qui répond à une vaste gamme de besoins des patients en matière de santé tout au long de leurs expériences de soins.</p>
Rendement et résultats organisationnels	Accessibilité	La facilité avec laquelle une personne peut commencer à établir un contact et obtenir les soins nécessaires, de même que les délais qui s'appliquent.
	Fonctionnement et climat	Cette catégorie regroupe les items liés au climat organisationnel en ce qui concerne l'interaction et la satisfaction de tous les intervenants d'une clinique.
	Viabilité et efficacité	La viabilité d'une clinique se mesure à la capacité de cette dernière à répondre adéquatement à la demande de services, à l'exploitation de la clinique de façon rentable et au soutien du développement à long terme de la clinique.
	Réceptivité au changement et capacité d'adaptation	Cette catégorie regroupe les items liés à la capacité de l'organisation à répondre aux besoins changeants de la population tout en tenant compte des transitions démographiques, épidémiologiques et sanitaires de la communauté. L'aptitude de la clinique à répondre adéquatement aux réformes en cours figure également dans cette catégorie.
Contexte organisationnel	Caractéristiques démographiques	Cette catégorie comprend les détails liés aux caractéristiques de la population et des patients desservis par la clinique. Une distribution est effectuée en fonction de l'âge, du sexe, du groupe ethnique et des déterminants spécifiques à la santé de la population. Les statistiques concernant les besoins particuliers en matière de soins de santé et les questions liées à la santé publique identifiées chez la population et les patients de la clinique font également partie de cette section.
	Environnement organisationnel et intégration de la pratique	L'environnement organisationnel définit le contexte de la clinique. Les items comme la distance entre les infrastructures de soins de santé, la présence de programmes de santé qui obligent une coordination entre différentes institutions, la présence d'une faculté de médecine, de même que l'existence de liens officiels ou non entre les organisations dans la communauté sont inclus dans cette catégorie.

4.2 APERÇU DE LA CLASSIFICATION DES ITEMS COMPRIS DANS LES QUESTIONNAIRES RETENUS

Le tableau 3 montre l'étendue de la couverture des catégories des caractéristiques organisationnelles des soins de première ligne par les 19 questionnaires retenus dans la présente étude de repérage. La règle utilisée pour la création du tableau était la suivante : pour figurer dans une catégorie, le questionnaire devait contenir au moins un item relatif à cette catégorie. Chaque catégorie contenait au moins un item extrait d'un questionnaire. Sur les 19 questionnaires retenus, deux questionnaires (CPORC et SOAPC) évaluaient un maximum de deux caractéristiques organisationnelles. Compte tenu de ses cinq questionnaires complémentaires, TransforMED est l'outil de mesure qui englobait le plus grand nombre des caractéristiques organisationnelles de notre système de classification. En fait, nous avons constaté qu'il couvrait 21 des 23 catégories. Toutefois, le questionnaire organisationnel du projet Évolution se démarquait du lot, car il permettait d'évaluer 18 des 23 catégories au moyen d'un seul questionnaire.

5 DISCUSSION

Les résultats de l'étude de repérage des caractéristiques organisationnelles de soins de santé de première ligne ont démontré à partir du système de classification que nous avons développé, que certains questionnaires permettaient une plus grande couverture des caractéristiques organisationnelles que d'autres. Deux outils se démarquent : le questionnaire du projet Évolution et les questionnaires TransformED lesquels offrent la plus grande couverture des caractéristiques organisationnelles des soins de santé de première ligne proposées dans notre système de classification. Signalons que le questionnaire du projet Évolution (Pineault et collab. 2012) a constitué une base importante pour la conception du questionnaire de l'ICIS permettant d'évaluer l'organisation et la prestation des soins de santé de première ligne, car il s'agit également d'un instrument validé ayant été utilisé à deux reprises dans la province de Québec.

Dans cette section nous discuterons plus en détail de la proportion des caractéristiques organisationnelles de soins de santé de première ligne couvertes par les questionnaires retenus, ainsi que des forces et des limites de notre étude de repérage.

5.1 CARACTÉRISTIQUES ORGANISATIONNELLES COUVERTES PAR LES QUESTIONNAIRES RETENUS

La figure 1 indique la proportion de caractéristiques organisationnelles des soins de santé de première ligne couvertes dans chacun des questionnaires classés par items dans notre étude de repérage. Bien que toutes les caractéristiques présentées dans le cadre de cette étude puissent servir à l'évaluation de l'organisation et de la prestation des soins de santé de première ligne, dans les questionnaires retenus certaines caractéristiques étaient plus présentes que d'autres.

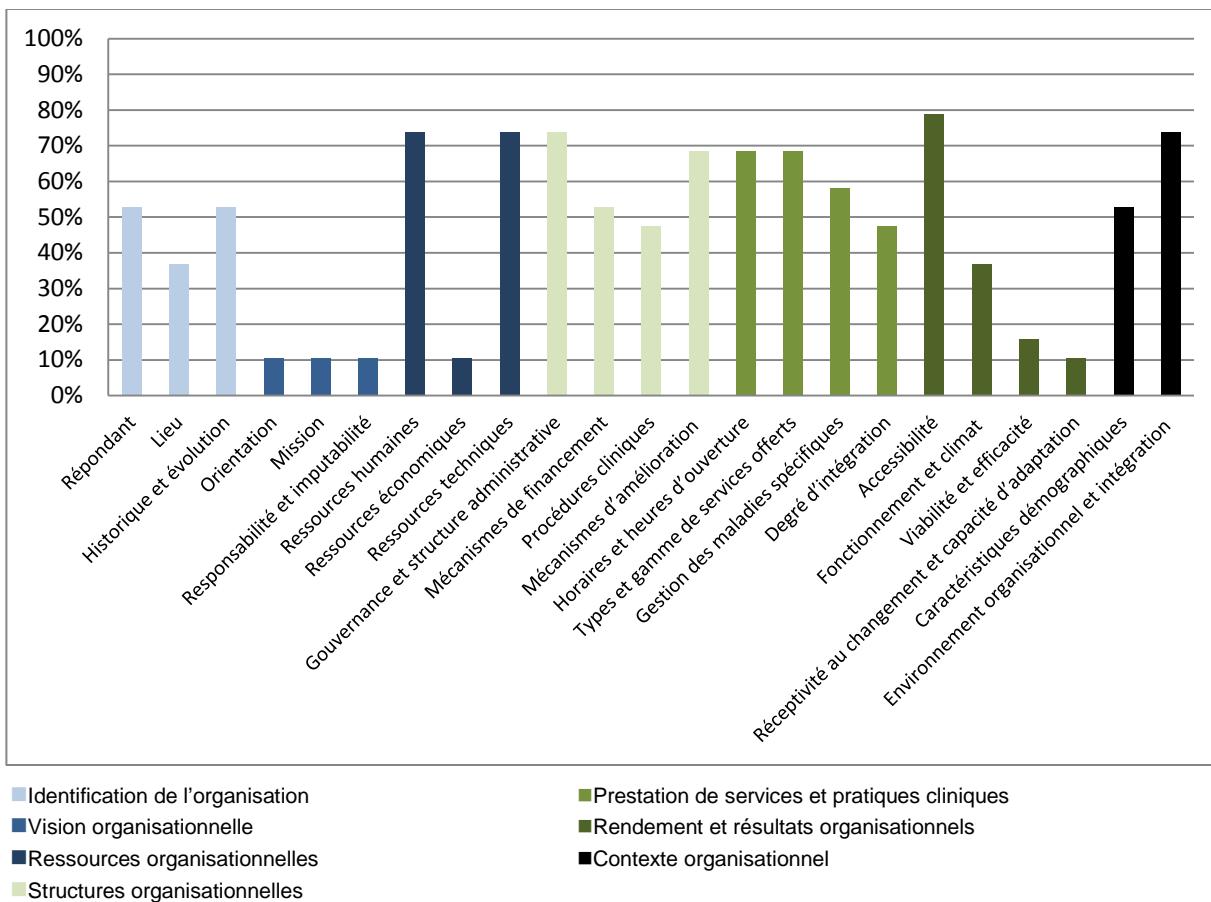

Figure 1 Proportion de caractéristiques organisationnelles couvertes par les questionnaires

L'accessibilité, les ressources humaines et techniques, la gouvernance et la structure administrative, de même que l'environnement organisationnel et l'intégration de la pratique sont des caractéristiques que l'on retrouve dans plus de 70 % des questionnaires retenus. De plus, les caractéristiques liées aux procédures de soins, comme les gammes de services, la gestion de maladies spécifiques, l'horaire ainsi que les mécanismes de sécurité, sont également des caractéristiques couvertes dans la majorité des 19 questionnaires.

Notre travail met également en lumière le fait que la couverture des caractéristiques organisationnelles des soins de santé de première ligne varie grandement d'un questionnaire à l'autre. En effet, certains concepts ne sont couverts qu'à moins de 20 % pour l'ensemble des questionnaires retenus. Des caractéristiques comme l'orientation de la clinique, sa mission, les mécanismes liés à la responsabilité et à l'imputabilité concernent la culture de l'organisation, un aspect important pouvant avoir diverses répercussions sur l'organisation d'une clinique ou sur la prestation des soins auprès de ses patients. La faible proportion de questions sur les ressources économiques disponibles démontre que cette caractéristique est peu évaluée par les questionnaires retenus à l'étude. Pourtant, la compréhension des ressources investies dans une clinique de soins de santé de première ligne est essentielle afin de bien évaluer son rendement ou son efficience. Par ailleurs, dans le cadre de l'évaluation de réformes des systèmes de santé, il est essentiel de fournir une

compréhension des investissements économiques requis dans les différentes formes d'organisation de soins de santé de première ligne. Finalement, la viabilité et l'efficacité ainsi que la réceptivité au changement étaient d'autres aspects moins sondés au moyen des questionnaires retenus dans notre étude. Le recours à ces types d'items, surtout liés aux processus dynamiques des organisations, seraient d'une certaine importance pour mieux comprendre le potentiel de réforme dans l'organisation et la prestation des soins de santé de première ligne ou d'innovation de la pratique actuelle.

En logeant chaque item contenu dans les questionnaires dans le système de classification que nous avons préalablement défini, il nous a été possible d'élaborer une importante base de données. Puisqu'aucun questionnaire ne couvre toutes les caractéristiques organisationnelles des soins de santé de première ligne, nous sommes persuadés que cette base de données permettra de réaliser des évaluations de façon plus optimale. Précisons que les utilisateurs pourront tirer profit cette base de données dans la mesure où leurs objectifs de recherche ou d'évaluation seront clairs et précis, ce qui orientera leur choix des items compris dans la base de données.

5.2 FORCES ET LIMITES

Dans l'ensemble, notre étude a permis de repérer de nombreux questionnaires validés disponibles pour mesurer les caractéristiques organisationnelles des soins de santé de première ligne. Nous avons également repéré des questionnaires non validés. Dans ces cas, nous n'avons pas cherché à en évaluer la validité, puisque la majorité de ces questionnaires comprenait les mêmes questions et concepts que ceux des questionnaires validés retenus dans notre étude. Toutefois, si les items classés à l'annexe 2 étaient utilisés pour élaborer un questionnaire, nous recommandons fortement qu'un test cognitif soit effectué au préalable afin de s'assurer de la compréhension des questions auprès du public cible ainsi que de l'exactitude des choix de réponses proposés.

Dans notre étude, l'accessibilité et la disponibilité des questionnaires ont constitué un défi à relever. Malgré tout, grâce à notre démarche méthodologique (revue de la littérature scientifique et grise ainsi que la méthode en boule de neige), nous croyons avoir été en mesure de repérer la grande majorité des questionnaires actuellement disponibles permettant de mesurer les caractéristiques organisationnelles des soins de santé de première ligne. La méthode en boule de neige a été particulièrement utile, puisque peu de questionnaires ont fait l'objet de publications scientifiques. Finalement, bien que nous ayons communiqué avec les experts reconnus en matière d'études organisationnelles sur les soins de santé de première ligne, nous ne pouvons affirmer que nous avons repéré tous les questionnaires disponibles et pertinents. Cela dit, notre étude de repérage repose sur une démarche de collecte et d'analyse des données qui nous a menés à une bonne saturation et nous croyons avoir ainsi couvert la plus grande partie du domaine.

Dans le cadre de cette étude, notre intention était surtout de cartographier les questionnaires existants et accessibles qui permettaient de mesurer des caractéristiques organisationnelles des soins de santé de première ligne et de proposer un ensemble de caractéristiques organisationnelles considérées comme importantes dans l'évaluation de l'organisation et de la prestation des soins de santé de première ligne. De plus, signalons que la qualité du

contenu des questionnaires ne figurait pas parmi les objectifs de la présente étude, et l'accès aux données obtenues grâce aux questionnaires aurait été nécessaire pour évaluer la qualité de certains questionnaires. Il faut souligner que le résumé de notre évaluation de la couverture des caractéristiques organisationnelles par les questionnaires retenus, et présenté dans le tableau 3, a reposé sur un critère dichotomique « élément couvert/non couvert ». Une analyse plus poussée serait nécessaire pour connaître le degré de couverture de chaque concept compris dans chacun des questionnaires retenus.

Les 19 questionnaires retenus étaient présentés, rappelons-le, sous différentes formes et ont été utilisés tant au Canada que dans d'autres pays. Bien que tous ces outils soient liés à un contexte de soins de santé de première ligne, ils ont été principalement utilisés dans des contextes spécifiques. Pour l'instant, on ne peut donc évaluer la pertinence d'utiliser certains de ces items dans un contexte canadien. Par exemple, l'outil de mesure TransforMED portait sur la compréhension de la transformation des pratiques de soins de santé de première ligne à partir d'une approche d'organisation de soins axés sur le patient et il était orienté vers un contexte organisationnel précis. Autre exemple, le questionnaire ISPCD, qui compare les caractéristiques des médecins de première ligne aux États-Unis avec celles des médecins de dix autres pays, a été utilisé dans le cadre d'une évaluation plus générique de l'organisation de soins de santé de première ligne.

Finalement, certains questionnaires considéraient l'organisation comme l'unité d'analyse, tandis que pour d'autres c'était le prestataire de soins en considérant l'organisation comme un élément de contexte qui influencent le travail de ces prestataires. La grande diversité des approches d'évaluation sous-jacente à la conception des questionnaires nous incite à faire preuve de prudence avant de faire le choix des items des divers questionnaires en nous assurant tout d'abord de leur pertinence en tenant compte des objectifs du projet d'évaluation et des contextes de l'organisation des soins de santé.

6 CONCLUSION

Il est important que les décideurs, les gestionnaires et les prestataires de services de santé aient accès à des données fiables et comparables générées dans le cadre d'évaluations de l'organisation et de la prestation des soins de santé de première ligne, et ce au moyen de questionnaires mesurant adéquatement les caractéristiques organisationnelles des soins de santé de première ligne.

La définition d'un grand nombre de caractéristiques organisationnelles par les auteurs qui ont publié dans le domaine, comme l'ont démontré les travaux de Haggerty et collab. (2007), de Hogg et collab. (2008), ainsi que la présente étude, suggère que la tâche de conceptualisation des caractéristiques organisationnelles des soins de santé de première ligne n'est pas simple. En effet, pour effectuer une analyse en profondeur de l'organisation et de la prestation des soins de santé de première ligne, de nombreuses caractéristiques doivent être prises en considération. En effet, nous avons vu que certaines caractéristiques organisationnelles sont moins mesurées, tandis que d'autres figurent dans presque tous les questionnaires retenus aux fins de cette étude de repérage. Comme l'ont démontré nos résultats, le questionnaire organisationnel du projet *Évolution* se démarquait particulièrement. Il était l'un des rares questionnaires sélectionnés qui avait été conçu en se basant sur quatre dimensions organisationnelles d'importance : la vision, la structure organisationnelle, le niveau de ressources et les caractéristiques des pratiques cliniques. Au moment de l'étude, ce questionnaire avait été utilisé et validé à deux reprises dans le contexte d'une vaste étude sur les modèles organisationnels et le rendement (2005 et 2010) dans la province de Québec, au Canada. Le fait que ce questionnaire ait été utilisé dans un contexte canadien est d'une pertinence particulière pour la présente étude; il a d'ailleurs été utilisé pour l'élaboration du questionnaire mesurant les caractéristiques organisationnelles pour le *Projet d'étude des soins de santé de première ligne* de l'ICIS.

Enfin, rappelons que notre étude avait pour objectif de repérer et de classifier les questionnaires existants et disponibles, et qu'elle a aussi permis d'atteindre un autre objectif : fournir une base de données pour le développement de questionnaires utiles dans le cadre d'une étude mesurant les caractéristiques organisationnelles des soins de santé de première ligne.

CPCQ: Continuity of Primary Care in Quebec – Haggerty, J. (Québec - Canada)			
Clinic organization questionnaire	OSSPL, autoadministré 14 questions	- Caractéristiques de la clinique - Dimensions multiples	Échantillonnage: 221 médecins issus de 100 cliniques privées et centre local de services communautaires (CLSC), ont participé à l'étude. Type: Étude régionale Année de collecte: en 2002 Pays: Canada (Québec) Résumé: Cette étude examine l'état de l'accessibilité, la continuité et la coordination des soins de santé de première ligne en 2002, à l'aube de la réorganisation du système de santé de première ligne du Québec.
Provider questionnaire	PS, autoadministré 60 questions	- Caractéristiques du médecin de famille - Caractéristiques de la clinique - données démographiques - Appartenance à la profession et à la clinique - Participation du personnel à la gestion de la clinique - Culture de la clinique - Satisfaction professionnelle	
Clinic functioning	Liste à cocher 11 questions	- Fonctionnement de la clinique - Dimensions multiples	
L'Évolution de l'organisation et de la performance des services de première ligne (2005-2010) dans deux régions du Québec : Montréal et Montérégie – Levesque, JFL. (Québec - Canada)			
Organisationnal Questionnaire	OSSPL, autoadministré (30 minutes) 65 questions	- Caractéristiques de la clinique - Resources and organisational structure - Services, pratiques et collaborations interorganisationnelles - Réorganisation des services SSP	Échantillonnage: 376 organisations de soins de santé de première ligne en 2010 et 472 en 2005 Type: Étude régionale Période de collecte: en 2005 et en 2010 Pays: Canada (Québec) Résumé: L'objectif principal de l'étude était d'identifier les modèles d'organisation de soins de santé de première ligne les mieux adaptés et les plus prometteurs pour répondre aux besoins et les attentes de la population.

Nom du questionnaire	Sources / items	Concepts couverts / échelles	Échantillonnage
PCOS-NS: Primary Care Organization Survey – Department of Health (Nova Scotia - Canada)			
Primary Care Organization Survey	OSSPL, auto-administré (30 minutes) 23 questions	<ul style="list-style-type: none"> - Caractéristiques de la clinique - Informations sur l'organisation des SSP - Planification des services de SSP - Mécanismes d'imputabilité - Collaboration - Processus d'amélioration de la qualité - Politiques et procédures organisationnelles - Technologies de l'information et de la communication 	<p>Échantillonnage: S.O. Type: Étude régionale Période de collecte: -- Pays: Canada (Nouvelle-Écosse)</p> <p>Résumé: Le but de l'enquête est d'évaluer les divers aspects des soins de santé de première ligne y compris l'accès aux programmes et services, les types de programmes et de services, la planification, les mécanismes de reddition de compte, la collaboration, les initiatives d'amélioration de qualité, les politiques et procédures organisationnelles et les technologies de l'information et de communication.</p>
Primary Health Care Provider/Team Survey	OSSPL, autoadministré (20 minutes) 74 questions	<ul style="list-style-type: none"> - Caractéristiques de la clinique - Informations démographiques du prestataire de soins - Collaboration et continuité des soins - Perfectionnement professionnel - fonctionnement d'équipe - Satisfaction générale au travail 	
CPORC: Clinicians' perception of organizational readiness for change in the context of clinical information system project : insights from two cross-sectional surveys – Paré, G. (Québec - Canada)			
	Équipe SSP, autoadministré 36 items	<ul style="list-style-type: none"> - La réceptivité au changement et la capacité d'adaptation - Historique organisationnel du changement - Politique et conflits organisationnels - Flexibilité organisationnelle - Auto-efficacité de groupe 	<p>Échantillonnage: Étude 1 : 138 infirmières ont rempli le questionnaire. Étude 2 : 235 questionnaires (207 cliniciens et 28 médecins) ont été remplis.</p> <p>Type: Étude régionale Période de collecte: en 2007-2008 Pays: Canada (Québec)</p> <p>Résumé: L'objectif principal de cette étude était d'étudier les variables associées à la réceptivité au changement organisationnel des cliniciens dans le contexte spécifique de mise en place de systèmes d'information clinique.</p>

ANNEXE 2

CLASSIFICATION DES ITEMS ISSUS DES QUESTIONNAIRES RETENUS

Cette annexe présente les questions se rapportant aux attributs organisationnels des soins de santé de première ligne, retrouvés dans les questionnaires et outils qui ont été retenus. Les questions sont regroupées en fonction de la classification présentée dans la Section 4 du présent document.

1 IDENTIFICATION DE L'ORGANISATION

1.1 RÉPONDANT

Cette catégorie comprend les éléments liés à l'identification du répondant (nom, sexe, âge, titre/fonction, etc.).

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
Identification de l'organisation / Répondant / Nom			
TransformED - FS	Q3	Name of person completing survey:	
NSPOII		Name:	
TransformED - BPS	Application, Q91	Who participated in completing this application form? (List all names and roles)	
TransformED - BPS	Application, Q92	Who in your practice has been involved in making the decision to apply, and how was it decided to apply?	
Identification de l'organisation / Répondant / Sexe			
BEACH - GP	Q1	Sex (Please circle.)	<input type="radio"/> Male / <input type="radio"/> Female
NAMCS - PIIIF	S1 - Q32b	What is your sex?	<input type="radio"/> Male / <input type="radio"/> Female
NATMEDCA - PQ	Q2	Gender	<input type="radio"/> Male / <input type="radio"/> Female
IDCP2D	Background, Q1		
ISPDCD	Practice Profile and Demographic Data - Q37	Are you ...?	<input type="radio"/> Male / <input type="radio"/> Female
NPS2010	SA, Q3	You are:	<input type="radio"/> Male / <input type="radio"/> Female
Identification de l'organisation / Répondant / Âge			
BEACH - GP	Q2	Age	_____
NATMEDCA - PQ	Q1	Age at last birthday (years)	
NAMCS - PIIIF	S1 - Q32a	What is your year of birth?	19_____
NPS2010	SA, Q2	Your year of birth:	19_____

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
ISPCD	Practice Profile and Demographic Data - Q36	How old are you?	<input type="radio"/> Under 35 / <input type="radio"/> 35-49 / <input type="radio"/> 50-64 / <input type="radio"/> 65 or older
Identification de l'organisation / Répondant / Ethnicité			
NAMCS - PIIF	S1 - Q7c	What is your ethnicity?	<input type="radio"/> Hispanic or Latino / <input type="radio"/> Not Hispanic or Latino
NAMCS - PIIF	S1 - Q7d	What is your race? (Mark (x) one or more.)	<input type="radio"/> White / <input type="radio"/> Black/African-American / <input type="radio"/> Asian / <input type="radio"/> Native Hawaiian / Other Pacific Islander
Identification de l'organisation / Répondant / Diplôme, qualifications ou poste			
NAMCS - PIIF	S1 - Q32h	What year did you graduate medical school?	_____ Year
BEACH - GP	Q3	How many years have you spent in general practice?	
NATMEDCA - PQ	Q4	How many years in this practice?	
NATMEDCA - PQ	Q5	Total years in General Practice	
NAMCS - PIIF	S1 - Q32i	Did you graduate from foreign medical school?	<input type="radio"/> Yes / <input type="radio"/> No
BEACH - GP	Q4	Country of graduation (primary medical degree)	
NATMEDCA - PQ	Q9	Where did you obtain your medical degree?	<input type="radio"/> New-Zealand / <input type="radio"/> Australia / <input type="radio"/> United Kingdom / <input type="radio"/> Asia / <input type="radio"/> North America / <input type="radio"/> Other (Specify) _____ <input type="radio"/> Doctor of Medicine (MD) / <input type="radio"/> Doctor of Osteopathic Medicine (DO) / <input type="radio"/> Nurse Practitioner / <input type="radio"/> Physician Assistant / <input type="radio"/> Nurse Midwife / <input type="radio"/> Other
NSPOII		Position of the respondent (e.g., President, Medical Director, etc.):	
TransforMED - BPS	Application, Q93	What is your (person completing this form) position in the practice? (Check all that apply.)	<input type="radio"/> Front Office / <input type="radio"/> Back Office (e.g. billing) / <input type="radio"/> Office Manager / <input type="radio"/> Nurse / <input type="radio"/> Medical Assistant / <input type="radio"/> Physician <input type="radio"/> Practice nurse / <input type="radio"/> Nurse Specialist (Specialty / <input type="radio"/> Nurse Practitioner / <input type="radio"/> Nurse Prescriber / <input type="radio"/> District Nurse / <input type="radio"/> General Practitioner (GP) (Salaried) / <input type="radio"/> GP (Partner) / <input type="radio"/> Other (please specify)
IDCP2D	Background, Q5	What is your role within your General Practice?	
NPS2010		If you fall into any of the following categories, please check the appropriate category and return this UNCOMPLETED questionnaire in the enclosed stamped, self-addressed envelope.	<input type="radio"/> I am a medical student / <input type="radio"/> I am completely retired / <input type="radio"/> I am a resident / <input type="radio"/> I am exclusively working in a non-medical field. Please specify:

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
NPS2010		Everyone else, please check ALL that apply to your current situation	<ul style="list-style-type: none"> <input type="checkbox"/> I am in full-time medical practice. <input type="checkbox"/> I am in part-time medical practice or semi-retired from the medical labour force. <input type="checkbox"/> I am a locum tenens. (If you do not have a permanent practice, complete the questionnaire in relation to last practice you served/are currently serving.) <input type="checkbox"/> I am employed in a medical or medically related field only or other non-clinical settings (e.g., administration, teaching, research) <input type="checkbox"/> I am on a leave of absence or sabbatical from active patient care. (Complete the questionnaire in relation to your most recent medical practice.) <input type="checkbox"/> I have a faculty appointment. <input type="checkbox"/> I have a formal hospital appointment. <input type="checkbox"/> Other, please specify:
NPS2010	SA, Q1	Which of these best describes you? (Please check only ONE.)	<ul style="list-style-type: none"> <input type="checkbox"/> Family physician/general practitioner / <input type="checkbox"/> Family physician/general practitioner with a special focus to my practice, please specify: / <input type="checkbox"/> Medical/surgical/laboratory specialist, please specify: / <input type="checkbox"/> Physician working exclusively as a physician in a non-clinical setting, please specify: / <input type="checkbox"/> Other, please specify:
TransforMED - BPS	Practice Staffing Demographi- cs, Q19	Identify the main physician contact for the practice's involvement in the TransforMED NDP:	Name: Specialty: Direct Phone Number: Email: Board certification: Total years in practice:

(Please check.)	<ul style="list-style-type: none"> <input type="checkbox"/> Office Manager/Receptionist / <input type="checkbox"/> Lead Physician / <input type="checkbox"/> Other Physician / <input type="checkbox"/> Nurse Practitioner / <input type="checkbox"/> Nurse / <input type="checkbox"/> Finance Manager/Accountant <input type="checkbox"/> Team leader/Medical director / <input type="checkbox"/> Head doctor/Physician in charge / <input type="checkbox"/> Member of the team of general practitioners / <input type="checkbox"/> Other, Specify: _____
Évolution		Position:	
NSPOII	SA, Q1a	Do you own or manage a medical group?	<input type="checkbox"/> Yes / <input type="checkbox"/> No
IDCP2D	Background, Q3	Are you a GP trainer in a vocational training scheme?	<input type="checkbox"/> Yes / <input type="checkbox"/> No
NATMEDCA - PQ	Q6	Post Graduate Qualifications	<input type="checkbox"/> M/FRNZCGP / <input type="checkbox"/> Overseas M/FRNZCGP equivalent / <input type="checkbox"/> Dip Obs / <input type="checkbox"/> Dip Anaesth / <input type="checkbox"/> Other (specify) _____
NATMEDCA - PQ	Q7	Are you a member of the New Zealand Medical Association?	<input type="checkbox"/> Yes / <input type="checkbox"/> No

1.2 LIEU

Le lieu comprend l'adresse, la ville et le type de milieu de travail.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Identification de l'organisation / Lieu			
TransforMED - FS	Q2	Practice Name:	
PPQCS		What is the name of your primary practice site?	
NSPOII		Name of Physician Organization:	
BEACH - GP	Q15	In which GP Division is this practice?	
TransforMED - BPS	Practice Information, Q53	If your practice has other office sites, please indicate how many	
TransforMED - BPS	Practice Demographics, Q1	Enter the following information about the PRACTICE: Address, this will also be the address where we will send the check to :	Practice name: Address: City: State: Zip: Email: Phone: Fax: Web site: City: State: Zip: Phone Number: Fax Number: Email:
NPS2010	SB, Q5	In which province(s)/territory(ies) do you currently work? (<i>Check all that apply</i>).	
BEACH - GP	Q14	Postcode of major practice address	
NPS2010	SB, Q6	Please provide the 6-digit postal code of your MAIN patient care setting OR main work setting:	
CPCQ	Practice Profile, Q1	Please provide the 6-digit postal code of your practice location:	
Evolution	SD, Q3	Where is your clinic located?	o In a building owned by the physicians or of which they are shareholders / o In rented offices in a commercial building for health professionals / o In rented office in a commercial building for any type of business / o In an establishment that is part of the publicly-funded health network (hospital, CLSC, etc.) / o Others (Specify: _____)

1.3 HISTORIQUE ET ÉVOLUTION DE LA CLINIQUE

Éléments liés à l'historique et à l'évolution de la clinique, y compris les détails comme l'âge de la clinique et les facteurs associés à sa croissance et à son développement.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Identification de l'organisation / Historique et évolution de la clinique / Âge de la clinique			
TransformED - BPS	Practice Demographics, Q2	Number of years has this practice been in existence. If a not yet established practice, please indicate the date when you anticipate the practice to begin.	
IMEPHC	S1, Q1	How long has this practice been in operation?	_____ Years <input type="radio"/> Less than 1 year / <input type="radio"/> 1 to 4 years / <input type="radio"/> 5 to 9 years / <input type="radio"/> Over 10 years
Evolution	SD, Q1	How long has your clinic been in operation?	<input type="radio"/> Less than 1 year / <input type="radio"/> 1 to 4 years / <input type="radio"/> 5 to 9 years / <input type="radio"/> Over 10 years
Evolution	SD, Q2	How long has your clinic been at this current location?	<input type="radio"/> Less than 1 year / <input type="radio"/> 1 to 4 years / <input type="radio"/> 5 to 9 years / <input type="radio"/> Over 10 years
NSPOII	SA,Q11	For approximately how many years has your IPA (Independent Practice Association) been in existence?	_____ Years
COMP-PC	S1, Q1	How long has this practice been in operation?	_____ Years
COMP-PC	S1, Q3	How long has this practice been an FFS (Fee-For-Service)/HSO (Health Service Organization)/FHN (Family Health Network)?	_____ Years
		How long has this practice been a FHT (Family Health Team)?	_____ Years
IMEPHC	S1, Q2	What model did the practice belong to before, and when did the transition take place?	<input type="radio"/> Family Health Network (FHN) / <input type="radio"/> Fee-For-Service (FFS) / <input type="radio"/> Family Health Group (FHG) / <input type="radio"/> Family Health Organization (FHO) / <input type="radio"/> Community Health Centre (CHC) / <input type="radio"/> Other Specify: _____
		Date of transition	(DD/MM/YR)
Identification de l'organisation / Historique et évolution de la clinique / Changements au sein du personnel de la clinique			
TransformED - BPS	S - Practice Staffing Demographics, Q22	Describe any planned or proposed changes to the number of clinicians on staff at this practice.	
TransformED - BPS	S - Practice Staffing Demographics, Q29	Describe any planned or proposed changes to the number of office staff (non physician, medical or administrative).	
TransformED - BPS	S - Practice Staffing Demographics, Q30	How many have left the practice within the last year?	Clinicians: _____ Staff: _____
TransformED - BPS	S - Practice Staffing Demographics, Q31	How many have joined the practice within the last year?	Clinicians: _____ Staff: _____

Our practice has changed in how it takes initiative to improve patient care 20. Our practice has changed in how it does business 21. Our practice has changed in how everyone relates</p>	<p>Please indicate how strongly you agree or disagree with each statement.</p> <p><input type="radio"/> Strongly disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree</p>

2. VISION ORGANISATIONNELLE

2.1 ORIENTATION

L'orientation de la clinique renvoie au système de valeurs et aux idéologies prédominantes qui orientent les actions, la prise de décisions et les priorités de l'organisation.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Vision organisationnelle / Orientation			
TransformED - BPS	S - Practice Staffing Demographics, Q35	Practice character (<i>Please distribute 100 points</i>) ^a	<ul style="list-style-type: none"> a) Practice Organization A is a very personal place. It is a lot like an extended family. People seem to share a lot of themselves. ____ % b) Practice Organization B is a very dynamic and entrepreneurial place. People are willing to stick their necks out and take risk. ____ % c) Practice Organization C is a very formalized and structured place. Procedures generally govern what people do. ____ % d) Practice Organization D is a very production oriented place. A major concern is with getting the job done and meeting targets. ____ %
TransformED - BPS	S - Practice Staffing Demographics, Q36	Practice's Leaders (<i>please distribute 100 points</i>) ²	<ul style="list-style-type: none"> a) Leaders in Practice Organization A are warm and caring – They seek to develop employees' full potential and act as their mentors or guides. ____ % b) Leaders in Practice Organization B are risk takers. They encourage everyone to take risks and be innovative. ____ % c) Leaders in Practice Organization C are rule enforcers. They expect employees to follow established rules, policies, and procedures. ____ % d) Leaders in Practice Organization D are coordinators and coaches. They help everyone meet the practice's goals and objectives. ____ %
TransformED - BPS	S - Practice Staffing Demographics, Q37	Practice Cohesion (<i>Please distribute 100 points</i>) ²	<ul style="list-style-type: none"> a) The glue that holds Practice Organization A together is loyalty and tradition. Commitment to this practice runs high. ____ % b) The glue that holds Practice Organization B together is commitment to innovation and development. There is an emphasis on being first. ____ %

^a The following question relates to the type of practice that your organization is most like. Each of these items contains four descriptions of practice. Please distribute 100 points among the four descriptions depending on how similar the description is to your practice. None of the descriptions is any better than the others they are just different. For each question, please use all 100 points. If a description does not fit your practice at all, please enter "0" rather than leaving a blank. For example, in the question below, if hypothetical Practice A seems somewhat similar to mine, B seems somewhat similar, and C and D do not seem similar at all, I might enter "70" points for A, "30" points for B, "0" points for C, and "0" points for D.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Evolution	SC, Q5c	Choose the statement that corresponds best to your clinic's vision in relation to: Responsibility / role of physician. <i>(Check one only.)</i>	<ul style="list-style-type: none"><input type="radio"/> The physician is principally a health expert who makes an accurate diagnosis and identifies the most effective treatment for the patient's disease.<input type="radio"/> The physician is principally a health enabler who uses his/her competence to partner with the patient to take more control over health within the context of the patient's needs and personal life circumstance.

2.2 MISSION

Cette catégorie est liée aux buts et aux objectifs prédominants de la clinique et du personnel dans leur travail. Les objectifs spécifiques sont ici mis en évidence.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Vision Organisationnelle / Mission			
CPCQ	S - Practice Culture, Q16	<p>To what extent does your group practice emphasize the following (or, if you are in solo practice, to what extent do you emphasize the following):</p> <ul style="list-style-type: none"> • Handling urgencies or emergencies for our regular patients. • Handling urgencies or emergencies for walk-in patients. • That our practice is first and foremost a business. • Being able to see newly ill patients within 1 day. • Managing chronic illness. • Doing prevention. • Attending to psychosocial needs of patients. • Offering patients the most up-to-date drugs and procedures. • Knowing the needs of the community where our practice is located. • Keeping on schedule. • Having good relationships with specialists to facilitate referrals. • Cost-effectiveness as a criterion for use of low-volume, high cost diagnostic procedures such as CT scans. • Maintaining phone access to MDs for patients. • Offering in-hospital follow-up for regular patients of the clinic's MDs. 	<p>Not at all To a very great extent</p> <p>1 2 3 4 5</p>
Evolution	SC, Q3	<p>Do you totally agree, partly agree, partly disagree or totally disagree with the following statements:</p> <ul style="list-style-type: none"> • Physicians see the clinic as a business for which financial return is important. • Clinic physicians should consider environmental or occupational causes when assessing patients' health problems. • Clinic physicians should consider social problems in their clinical interventions for patients (e.g. poverty, violence, substance dependence). 	<input type="checkbox"/> Totally agree / <input type="checkbox"/> Partly agree / <input type="checkbox"/> Partly disagree / <input type="checkbox"/> Totally disagree
Evolution	SC, Q4	<p>Do you totally agree, partly agree, partly disagree or totally disagree with the following statements (or doesn't apply because only 1 doctor in the clinic):</p> <ul style="list-style-type: none"> • Clinic professionals share the clinic's mission, values and objectives. • It is important for the clinic's general practitioners to work as a team. 	<input type="checkbox"/> Totally agree / <input type="checkbox"/> Partly agree / <input type="checkbox"/> Partly disagree / <input type="checkbox"/> Totally disagree / <input type="checkbox"/> Doesn't apply because only 1 doctor in the clinic
Evolution	SC, Q6	Choose the one statement that corresponds best to your clinic's priorities regarding service organization. (<i>Check one only</i>).	<input type="checkbox"/> Service accessibility is a higher priority. <input type="checkbox"/> Continuity of care for patients is a higher priority.
Evolution	SC, Q7	Choose the one statement that corresponds best to your clinic's preferred approach for obtaining desired health outcomes for your patients. (<i>Check one only</i>).	<input type="checkbox"/> Rather the application of evidence-based medicine and clinical guidelines. <input type="checkbox"/> Rather the participation and empowerment of the patient and his family.

2.3 RESPONSABILITÉ ET IMPUTABILITÉ

Cette catégorie comprend les renseignements sur la responsabilité et l'imputabilité de l'organisation auprès des institutions professionnelles et des corps gouvernementaux compétents, de même que la santé de la communauté et le système global de soins de santé.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Vision organisationnelle / Responsabilité et imputabilité			
QUALICOPC	S - Community responsibility, Q58	If you were confronted with the following among your patients, would you report this (for instance to an authority)? <ul style="list-style-type: none"> a) Repeated accidents at a factory. b) Frequent respiratory problems in patients living near a factory. c) Repeated cases of food poisoning among people living in a certain district. 	<input type="radio"/> Yes / <input type="radio"/> Probably yes / <input type="radio"/> Probably not / <input type="radio"/> No / <input type="radio"/> Don't know
Evolution	SA, Q7	To what extent do general practitioners at your clinic feel responsible for the health of the population in the neighbourhood, village or territory where your clinic is located?	<input type="radio"/> Highly / <input type="radio"/> Fairly / <input type="radio"/> Slightly / <input type="radio"/> Not at all
Evolution	SA, Q8	To what extent do general practitioners at your clinic feel accountable for their professional activities to... <ul style="list-style-type: none"> a) The Régie de l'assurance maladie du Québec (RAMQ)? b) The Collège des médecins? c) Colleagues at work? d) Governance/clinic managers? 	<input type="radio"/> Highly / <input type="radio"/> Fairly / <input type="radio"/> Slightly / <input type="radio"/> Not at all / <input type="radio"/> Doesn't apply because only one doctor in the clinic

3. RESSOURCES ORGANISATIONNELLES

3.1 RESSOURCES HUMAINES

La catégorie des ressources humaines comprend les aspects reliés à la composition et à l'implication du personnel de la clinique. Les détails concernant le nombre de professionnels de la santé, le nombre d'heures travaillées par semaine, de même que l'âge, le sexe, le milieu de travail et les fonctions occupées par les divers membres du personnel font également partie des éléments pris en considération.

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
Ressources organisationnelles / Ressources humaines / Taille ou composition des équipes de professionnels de la santé			
NSPOII	SA, Q8	Which ONE of the following three statements best describes your Independent Practice Association (IPA)? If response is 3: What is the main specialty in your IPA?	<ul style="list-style-type: none"> 1. It is mainly primary care physicians. [please consider primary care physicians to include family practitioners, general internists, general practitioners, and general pediatricians] 2. It is a multispecialty IPA that includes both specialists and primary care physicians. 3. It is mainly non-primary care specialists <ul style="list-style-type: none"> • Individual General Practitioners (including yourself)? • Full time equivalent General Practitioners (including yourself)? • Individual Practice Nurses? • Full time equivalent Practice Nurses?

4. STRUCTURES ORGANISATIONNELLES

4.1 GOUVERNANCE ET STRUCTURE ADMINISTRATIVE

Tous les enjeux liés à la gestion sont regroupés ici. La propriété, la structure organisationnelle verticale et horizontale, les processus de prise de décisions, les politiques administratives et les éléments concernant la structure opérationnelle de la clinique (par exemple le système de prise de rendez-vous) se retrouvent donc dans cette catégorie. Les aspects relatifs au leadership, à l'intégration dans la communauté, et plus particulièrement l'implication du patient et des membres de la communauté dans la planification stratégique des soins de santé, de même que les autorités organisationnelles, régionales et locales en matière de santé figurent également dans la catégorie de la gouvernance.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Structures organisationnelles / Gouvernance et structure administrative / Propriété

PCOS-NS	S1, Q7	Recent work in Canada has identified four main categories of primary health care organization models. These models are described below. Please place a check mark by the model that best describes your primary health care organization. If your organizational model is a mix of two or more of the models listed below, please describe your model in the bottom row of the table.	
IMEPHC	S1,Q3	Please identify the governance structure of this practice:	<input type="checkbox"/> Community governed / <input type="checkbox"/> Physician governed / <input type="checkbox"/> Other

^a This is a model in which care is provided primarily in a physician's office by a family physician in solo or group practice. It is staffed primarily by physicians and generally reimbursement is on a fee-for-service basis. Information systems are for internal use. There are no formal mechanisms to ensure the continuity of care except loyalty to the physician and there are no formal mechanisms to ensure integration with other parts of the health care system, other than physician affiliations with other resources of care (e.g., referrals to specialists).

^b Organizations provide continuous service over time to a defined group of patients/population. Funding is based on a per capita, sessional fee, fee-for-service or other model(s), or a mix of models. There are non-physicians such as nurses on the care team and a physician or nurse is designated to provide followup and continuity of care for the patient. There will generally be a nurse who provides liaison with other parts of the health care system and coordinates the clinical integration of services.

^c The focus of this model is to promote the integration of primary health care into the other parts of the health care system. There is generally a range of providers operating in a community health centre format. Information technology serves the organization and is linked to other, external service providers serving the population. Care responsibility is longitudinal (long term) and is provided by a multi-disciplinary care team. There is active cooperation and coordination with other primary health care providers and with providers of complementary services such as hospitals to guarantee the availability of a range of services.

^d This model is similar to the integrated model in its structure but is differentiated by a lack of specific integration mechanisms. For example, information systems do not link to other parts of the health care system. Services are not provided on a 24/7 basis and there are generally no, or few, mechanisms to ensure the longitudinal continuity of care services to individuals.

Structures organisationnelles / Procédures cliniques / Organisation des services			
QUALICOPC	S - Patient turnover, Q37	If new patients enter your practice, do you or your nurse normally have an intake conversation?	<input type="radio"/> Yes, always or usually / <input type="radio"/> Only occasionally / <input type="radio"/> Rarely or never
Evolution	SB, Q1a-b	At your clinic, ... <ul style="list-style-type: none"> a. Is there staff mainly assigned to reception of patients? b. Is there staff mainly assigned to manage medical records (opening new files, managing archives)? 	<input type="radio"/> Yes / <input type="radio"/> No
Evolution	SA, Q6	Do any general practitioners at your clinic share... <ul style="list-style-type: none"> • Coverage of walk-in clinic periods? / • Coverage of scheduled appointments periods? / • In-hospital care for clinic patients? / • Patient follow-up? / • Replacement for physician absent from the clinic? 	<input type="radio"/> Yes / <input type="radio"/> No / <input type="radio"/> Doesn't apply because only 1 doctor in the clinic “
TransformED - MHVSA	S-Point of Care Service, Q4	Does your practice conduct pre-visit planning to create reminders for specific tests, medication review, and preventive and follow-up care?	<input type="radio"/> Yes / <input type="radio"/> No
CPCQ	S - Practice Profile, Q10	Does a nurse do triage of acute care (during walk-in hours)?	<input type="radio"/> Yes / <input type="radio"/> No
Evolution	SB, Q26	In general, appointments with specialists are made by...	<input type="radio"/> The patient / <input type="radio"/> Clerical staff / <input type="radio"/> The clinic nurse / <input type="radio"/> The physician

4.4 MÉCANISMES D'AMÉLIORATION DE LA QUALITÉ ET DE LA SÉCURITÉ DU PATIENT

L'existence de procédures de contrôle et d'amélioration de la qualité, comme l'évaluation des résultats et de la satisfaction, la formation professionnelle continue, les initiatives d'amélioration de la qualité, l'application de modèles d'amélioration (par exemple : PDSA, LEAN, etc.), de même que les mécanismes mis en place pour assurer la sécurité du patient (procédures de collecte et de suivi des plaintes, implantation de guide de pratique, conciliation des médicaments, mécanismes d'imputabilité, etc.), sont des aspects importants de la structure organisationnelle et sont documentés dans cette catégorie.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Structures organisationnelles / Mécanismes d'amélioration de la qualité et de la sécurité du patient / Processus et Initiatives d'amélioration de qualité			
NATMEDCA - Practice Q.	S - Quality management, Q17	Does the practice have a written training policy for staff?	<input type="radio"/> Yes / <input type="radio"/> No
NATMEDCA - Practice Q.	S - Quality management, Q18	Does the practice have a written development policy for staff?	<input type="radio"/> Yes / <input type="radio"/> No
NATMEDCA - Practice Q.	S - Quality management, Q19	Does the practice have a written policy for ongoing quality management (e.g. "GNZCGP quality programme, CHASP")?	<input type="radio"/> Yes / <input type="radio"/> No
NATMEDCA - Practice Q.	S - Quality management, Q20	Does the practice have a formal peer review process?	<input type="radio"/> Yes / <input type="radio"/> No
TransforMED - BPS	S - Practice Staffing Demographics , Q25, 34	25. How does your practice motivate clinicians (MD, DO, NP, PA)? 34. How does your practice motivate staff? (Fill all that apply.)	<input type="radio"/> Compensation bonus / <input type="radio"/> Socializing opportunities / <input type="radio"/> Travel opportunities / <input type="radio"/> Continuing education opportunities / <input type="radio"/> Recognition / <input type="radio"/> Encourage development of new skills / <input type="radio"/> Career advancement / <input type="radio"/> Other (please specify)
TransforMED - PEC	S - Mindfulness, Q5-8	5. People in this practice actively seek new ways to improve how they do things. 6. This practice is able to easily adjust routines to deal with unusual situations. 7. People in this practice are thoughtful about how they do their jobs. 8. People at all levels of this office openly talk about what is and isn't working.	Please indicate how strongly you agree or disagree with each statement. <input type="radio"/> Strongly disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
TransforMED - PEC	S - Reflection, Q31-32	31. People in this practice regularly take time to reflect on how they do things. 32. After trying something new, people in this practice take time to think about how it worked.	Please indicate how strongly you agree or disagree with each statement. <input type="radio"/> Strongly disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
TransforMED - MHVSA	S-Quality and Safety, Q5	Does your practice participate in a performance reporting and improvement process at least quarterly?	<input type="radio"/> Yes / <input type="radio"/> No
PCPSS	Q1	At your practice site is there one individual who initiates and leads most quality improvement efforts?	<input type="radio"/> Yes / <input type="radio"/> No / <input type="radio"/> Don't know

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
PPQCS	Q4a,b	a. At your practice site is there one individual who initiates and leads most efforts to improve clinical quality? If YES, is this person a...	(if there is more than one individual check "No") <input type="radio"/> No/Don't know / <input type="radio"/> Yes <input type="radio"/> Physician / <input type="radio"/> Non-physician clinician (e.g., RN, NP, PA) / <input type="radio"/> Other member of the practice site staff
PCPSS	Q2	Approximately how often do the clinicians and staff at your practice site hold meeting to discuss the practice site's performance on... • Clinical quality profiles? / • Patient satisfaction rating? / • Productivity? / • Utilization or costs of care? / • Physician or staff experience?	<input type="radio"/> Never/Don't know / <input type="radio"/> Annually / <input type="radio"/> Quarterly / <input type="radio"/> Monthly / <input type="radio"/> More often than monthly "
PCPSS	Q3	Approximately how often do the clinicians and staff at your practice site hold meeting to discuss the quality of care delivered by... • Specialists outside the practice? / • Hospital serving patients of practice?	<input type="radio"/> Never/Don't know / <input type="radio"/> Annually / <input type="radio"/> Quarterly / <input type="radio"/> Monthly / <input type="radio"/> More often than monthly "
PCPSS	Q4	Does your practice site give feedback to individual clinicians or staff about their personal performance on... • Clinical quality profiles? (e.g. HEDIS measures) / • Patient satisfaction ratings? (e.g. patient experience surveys) / • Productivity? (e.g. RVUs per clinical session) / • Utilization or costs of care? (e.g. generic drugs, imaging) / • Caring for chronic illness? (e.g. asthma or diabetes)	<input type="radio"/> Yes / <input type="radio"/> No / <input type="radio"/> Don't know "
PCPSS	Q5	Are clinicians and staff given feedback on practice-level performance on... • Clinical quality profiles? (e.g. HEDIS measures) / • Patient satisfaction ratings? (e.g. patient experience surveys) / • Productivity? (e.g. RVUs per clinical session) / • Utilization or costs of care? (e.g. generic drugs, imaging) / • Caring for chronic illness? (e.g. asthma or diabetes)	<input type="radio"/> Yes / <input type="radio"/> No / <input type="radio"/> Don't know "
PPQCS	Q3	During the past year, did your practice site implement any new initiatives to improve performance on... • Clinical quality profiles? (e.g., HEDIS measures) / • Patient satisfaction ratings? (e.g., patient experience surveys) / • Productivity? (e.g., RVUs per clinical session) / • "Cost-efficiency" profiles? (e.g., GIC reports)	<input type="radio"/> Yes / <input type="radio"/> No / <input type="radio"/> Don't know "
NSPOII	SE, Q13-16	At present or within the past year, has your IPA participated in any of the following quality demonstration programs: 13. Bridges to Excellence? 14. An IHI Quality Collaborative? 15. Pursuing Perfection? 16. Improving Chronic Illness Care (ICIC)	<input type="radio"/> Yes / <input type="radio"/> No "
NSPOII	SE, Q17	Does your IPA participate in any other quality demonstration programs with any organization external to yours? (If yes, what is the name of that program?)	<input type="radio"/> Yes / <input type="radio"/> No
NSPOII	SH, Q5-6	5. Does your IPA routinely profile the clinical quality of your physicians?	<input type="radio"/> Yes / <input type="radio"/> No
NSPOII	SH, Q5-6	6. How long has your physician IPA routinely profiled the clinical quality of your own physicians?	<input type="radio"/> For 1 year or less / <input type="radio"/> 2-4 years / <input type="radio"/> 5 or more years / <input type="radio"/> We do not profile on this measure type

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
NSPOII	SH, Q26-29	<p>Using a scale of 1 to 5, please tell from your own experience how effective you think each of the following approaches is in changing physician behavior to deliver better quality care.</p> <p>26. Financial incentives 27. Peer pressure (e.g., performance reports that compare a doctor's performance to other doctors in the IPA) 28. Public reporting of performance results 29. System level assistance (e.g., information systems investment and support)</p>	<p>1. Not Effective 2. 3. Moderately Effective 4. 5. Very Effective</p>
NSPOII	SH, Q30-33	<p>Using a scale of 1 to 5 please tell how important each of the following is as a motivator for quality improvement for your IPA.</p> <p>30. Public accountability, that is, publicly available performance results? 31. Improving patient outcomes? 32. Increasing patient satisfaction? 33. Earning pay for performance incentive payments from health plans?</p>	<p>1. Not important 2. 3. Somewhat important 4. 5. Very important</p>
NSPOII	SH, Q34-37	<p>Using a scale of 1 to 5 please tell to what extent each of the following is a barrier to your IPA's quality improvement activities</p> <p>34. Time 35. Money and other resources to invest in staff, training, or equipment 36. Information systems 37. Knowledge and expertise</p>	<p>1. No barrier 2. 3. Moderate barrier 4. 5. Great barrier</p>
Evolution	SA, Q4.d, e	<p>d. At your clinic, is there anyone who ensures that the quality of medical acts is evaluated? e. At your clinic, is there anyone who organizes continuing medical education activities? (<i>Circle only one answer per statement.</i>)</p>	<p><input type="radio"/> No / <input type="radio"/> Yes – A physician - in-charge or designated physician / <input type="radio"/> Yes – The group physicians collectively / <input type="radio"/> Yes – Administrator/manager / <input type="radio"/> Doesn't apply because only 1 doctor in the clinic</p>
PCOS-NS	S5,Q18	<p>(i) Has your primary care organization implemented any quality improvement initiatives over the past 12 months? (ii) If yes, has your primary care organization implemented any changes in clinical practice as a result of these quality improvement initiatives? (iii) If yes, please briefly describe a few examples of such changes in clinical practice.</p>	<p>(i) <input type="radio"/> Yes / <input type="radio"/> No (ii) <input type="radio"/> No / <input type="radio"/> Yes</p>
PPQCS	Q16	<p>To the best of your knowledge, within the last 2 years did the practice site receive assistance from the following organizations for the purpose of improving the quality of clinical care?</p> <ul style="list-style-type: none"> • A health plan / • A professional society / • An independent consultant / • Any of the following: Baycare, HVMA, Fallon, PCHI, Lahey, PCLLC, UMass, New England Quality Care Alliance / • An organization not named above 	<p><input type="radio"/> No/Don't know <input type="radio"/> Yes (If yes, please write name) : _____ "</p>
TransforMED - PCMHC	S - Quality Measures, Q2	Your practice is a culture of improvement if you and your staff:	<p><input type="radio"/> Establish core performance measures / <input type="radio"/> Collect data for better clinical management / <input type="radio"/> Analyze the data for quality improvement / <input type="radio"/> Map processes to identify efficiencies / <input type="radio"/> Discuss best practices</p>
NSPOII	SE, Q9	During the past year, did your IPA receive better contracts (for example, better payment, preferred status) with health plans for its performance on measurements of patient satisfaction and/or clinical quality?	<p><input type="radio"/> Yes / <input type="radio"/> No</p>

NSPOII	SG, Q12-15	<p>Does your IPA have a written or formal policy regarding treatment of tobacco dependence stating that your physicians should...</p> <p>12. Implement a tobacco-user identification system in every practice?</p> <p>13. Document tobacco-use status in the medical record of every patient?</p> <p>14. Discuss with your IPA's patients who use tobacco their tobacco use, including advising them to quit?</p> <p>15. Provide information to your IPA's patients about methods and strategies to quit, and/or giving them information about medications to aid in smoking cessation?</p>	<input type="radio"/> Yes / <input type="radio"/> No “
NSPOII	SG, Q16	Does your IPA have designated staff to coordinate and provide tobacco dependence treatments?	<input type="radio"/> Yes / <input type="radio"/> No
NSPOII	SG, Q17	Does your IPA receive financial incentives from Health Maintenance Organizations (HMOs) to improve performance on HEDIS smoking measures?	<input type="radio"/> Yes / <input type="radio"/> No
NSPOII	SG, Q18	Does your IPA evaluate the degree to which physicians provide smoking cessation interventions?	<input type="radio"/> Yes / <input type="radio"/> No
NSPOII	SG, Q19	Has your IPA used the 2000 Clinical Practice Guideline for Treating Tobacco Use and Dependence published by the Public Health Service (PHS) to improve the way in which your IPA provides smoking cessation services?	<input type="radio"/> Yes / <input type="radio"/> No

5.4 DEGRÉ D'INTÉGRATION

L'importance de l'échange d'information, de la collaboration, de la coordination et de l'intégralité dans l'adaptation du traitement au patient tout au long des soins qui lui sont prodigués.

« L'échange d'information » renvoie au niveau de communication entre les intervenants tout au long des soins prodigués au patient.

Le terme « collaboration » renvoie spécifiquement à l'importance du travail d'équipe entre les omnipraticiens, les spécialistes et les autres professionnels de la santé afin d'offrir des soins optimaux aux patients.

La « coordination » concerne la prestation et l'organisation d'une combinaison de services et d'information grâce auxquels les intervenants peuvent répondre aux besoins des patients en matière de santé.

L'« intégralité » est la caractéristique d'une offre de services qui répond à une vaste gamme de besoins des patients en matière de santé tout au long de leurs expérience de soins.

NAMCS - EMRS	Q10	During your last normal week of practice, approximatively how many office visits did you have at the reporting location? (A normal week would be one with a normal case load, with no holidays, vacations or conferences.)	_____ office visits
TransforMED - BPS	S - Patient Demographics, Q11	<p>Please describe patient visits for your practice. (Please provide a numerical response)</p> <p>What is the approximate number of patient visits per clinician per year at this practice?</p> <p>Source of estimates: (1=EMR, 2=billing data, 3= best guess)</p>	
TransforMED - FS	Q19	Please give your best estimate on the monthly average of patient visits for the practice during the last 12 months?	
PPQCS	Q35	Between 2005 and 2006, to the best of your knowledge what was the approximate change in the total number of patient visits for your practice (i.e., approximate change in total RVUs for the year)?	<input type="radio"/> Decrease: <input type="radio"/> >5% / <input type="radio"/> 3-5% / <input type="radio"/> 1-3% <input type="radio"/> No change <input type="radio"/> Increase: <input type="radio"/> 1-3% / <input type="radio"/> 3-5% / <input type="radio"/> >5%
PCPSS	Q35	During 2010, approximately how many patients received primary care from practice site?	<i>Please count each patient only once, no matter how much care he or she received.</i> _____ = number of patients or <input type="radio"/> Don't know
NPS2010	SD, Q14d	Please estimate the number of patients you see in a TYPICAL WEEK, EXCLUDING patient visits while you are on-call (on-call is defined as time outside of regularly scheduled activity during which you are available to patients):	Number of patients you see per week: _____ patients
NATMEDCA - PQ	Q15	Average number of day-time patients per week	
ISPCD	Practice Profile and Demographic Data - Q31	About how many patients do you see in a typical week of practice? (<i>Your best estimate will do.</i>)	

6.2 FONCTIONNEMENT ET CLIMAT

Cette catégorie regroupe les éléments liés au climat organisationnel en ce qui concerne l'interaction et la satisfaction de tous les intervenants d'une clinique.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Rendement et résultats organisationnels / Fonctionnement et climat / Cohésion d'équipe et partage d'idées			
TransforMED - PEC	S - Heedfull Interactions, Q10-11	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>10. People in this practice understand how their jobs fit into the rest of the practice. 11. People are aware of how their actions affect others in this practice.</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
TransforMED - PEC	S - Respectful Interaction, Q13-15	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>13. Most people in this practice are willing to change how they do things in response to feedback from others. 14. Opinions are valued by others in this practice. 15. People in this practice are comfortable telling others what they really think.</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
TransforMED - PEC	S - Diversity, Q17-20	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>17. Everybody in this practice tends to think the same about important issues. 18. People in this practice actively seek out the opinion of others. 19. This practice encourages everyone (front office staff, clinical staff, nurses, and clinicians) to share ideas. 20. People in this practice are able to disagree but still get along with each other.</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
SOAPC	S - Communication, Q1-4	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>1. When there is a conflict in this practice, the people involved usually talk it out and resolve the problem successfully 2. Our staff has constructive work relationships 3. There is often tension between people in this practice 4. The staff and clinicians in this practice operate as a real team</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
SOAPC	S - Decision making, Q5-12	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>5. This practice encourages staff input for making changes and improvements 6. This practice encourages nursing and clinical staff input for making changes and improvements 7. All of the staff participates in important decisions about the clinical operation 8. Practice leadership discourages nursing staff from taking initiative 9. This is a very hierarchical organization; decisions are made at the top with little input from those doing the work 10. The leadership in this practice is available for consultation on problems 11. The practice defines success as teamwork and concern for people 12. Staff are involved in developing plans for improving quality</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
NSPOII	SH, Q1-4	<p>To what extent do you believe that the majority of the physicians in your IPA would agree with each of the following four statements?</p> <p>1. To what extent would they agree that the IPA is a lot like an extended family where people are warm, caring, and loyal; interested in developing each other's potential; and with a fair distribution of rewards? 2. To what extent would they agree that the IPA is dynamic with people willing to try new things; an emphasis on being first; an emphasis on growth; with the most</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neither Agree nor Disagree / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “

6.3 VIABILITÉ ET EFFICACITÉ

La viabilité d'une clinique se mesure à sa capacité à répondre adéquatement à la demande de services, à exploiter la clinique de façon rentable et à soutenir le développement à long terme de la clinique.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Rendement et résultats organisationnels / Viabilité et efficacité / Viabilité financière			
TransformED - BPS	S - Practice Characteristics, Q56	In the past three years, has your practice experienced a:	<input type="radio"/> Large financial gain / <input type="radio"/> Small financial gain / <input type="radio"/> No change / <input type="radio"/> Small financial loss / <input type="radio"/> Large financial loss
TransformED - BPS	S - Practice Characteristics, Q57	What is the approximate percentage overhead, including rent and all employee salaries (total operating costs as a % of total medical revenue)?	<input type="radio"/> <25% / <input type="radio"/> 30% / <input type="radio"/> 40% / <input type="radio"/> 50% / <input type="radio"/> 60% / <input type="radio"/> 70% / <input type="radio"/> >70%
TransformED - FS	Q4	Which of the following best describe the profitability of your practice during the most recent 12 months?	A. The practice made a substantial profit / B. The practice made a small profit / C. The practice broke even / D. The practice had a slight loss / E. The practice had a significant loss / F. I don't have the details If choice "F" was selected, please explain _____
TransformED - FS	Q5	Which of the following statements best describes your concern about the long term financial condition of your practice?	A. No concern for the foreseeable future / B. Slight concern / C. Major concern If choices "B" or "C" were selected, please explain _____
TransformED - FS	Q6	During the most recent 12 months have any paychecks been delayed or eliminated for any practice staff, including clinicians, due to financial constraints on the practice?	<input type="radio"/> Yes / <input type="radio"/> No
TransformED - FS	Q7	During the most recent 12 months have any physicians received less than expected monthly income?	<input type="radio"/> Yes / <input type="radio"/> No
TransformED - FS	Q8	During the most recent 12 months have any vendor payments been postponed due to cash flow concerns?	<input type="radio"/> Yes / <input type="radio"/> No
TransformED - FS	Q11	When was the last time your practice gave most of your staff members a raise (for any reason)?	A. This year / B. Last year / C. Before last year / D. Not sure If choice "D" was selected, please explain. _____
TransformED - FS	Q12	In the past 12 months, has your practice: (Check all that apply.)	<input type="radio"/> Delayed capital expenditures / <input type="radio"/> Invested in new capital expenditures / <input type="radio"/> Taken on new debt for capital expenditures / <input type="radio"/> Taken on new debt to cover operational expenses / <input type="radio"/> None of the above / <input type="radio"/> Don't know
PPQCS	Q30	Over the past 2 years, how has the overall financial situation of the practice site changed?	<input type="radio"/> Much worse / <input type="radio"/> Somewhat worse / <input type="radio"/> No change / <input type="radio"/> Don't know / <input type="radio"/> Somewhat better / <input type="radio"/> Much better
PPQCS	Q36	Between 2005 and 2006, to the best of your knowledge what was the approximate change in the clinical income of your practice?	<input type="radio"/> Decrease: o >5% / o 3-5% / o 1-3% <input type="radio"/> No change <input type="radio"/> Increase: o 1-3% / o 3-5% / o >5%
NPS2010	SC, Q9	What percentage of your gross professional income goes towards running your practice (e.g., part-time or full-time staff, leases/rent/mortgage, equipment leasing/rental, personal benefits, vehicle costs, professional fees, malpractice dues, other overhead expenses)?	_____ % <input type="radio"/> Not Applicable

6.4 RÉCEPTIVITÉ AU CHANGEMENT ET CAPACITÉ D'ADAPTATION

Cette catégorie regroupe les éléments liés à la capacité de l'organisation à répondre aux besoins changeants de la population tout en tenant compte des transitions démographiques, épidémiologiques et sanitaires de la communauté. L'aptitude de l'organisation à répondre adéquatement aux réformes en cours figure également dans cette catégorie.

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
Rendement et résultats organisationnels / Réceptivité au changement et capacité d'adaptation			
TransforMED - PEC	S - Learning Culture, Q39-42	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>39. This practice learns from its mistakes. 40. It is hard to get things to change in this practice. 41. This practice tends to be very flexible. 42. This practice likes to be on the cutting edge of new ideas.</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
TransforMED - PEC	S - Kotter's Practice Change Factors, Q91-98	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>91. There is a strong sense of urgency about needing to change how the practice does its work. 92. Leadership strongly supports practice change efforts. 93. This practice has a clear, expressible vision. 94. There is frequent and good communication throughout the practice about how the different change initiatives are going. 95. Everyone in the practice feels able to act on the practice vision. 96. The practice has experienced many past changes successes. 97. The practice appears to let setbacks and problems stop its change efforts. 98. Once this practice implements a change, the change tends to stick.</p>	<input type="radio"/> Strongly Disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree “
CPORC	S - Organizational History of Change 1-3	<p>1. Our unit has successfully implemented other technological changes in recent years. 2. Nursing staff in our unit have had negative experiences with technological projects in the past (reversed item). 3. Our unit is usually successful when it undertakes all types of changes.</p>	Strongly disagree 1 2 3 4 5 6 7 Strongly agree
CPORC	S - Organizational Flexibility 1-3	<p>1. Our unit is structured to allow superiors to make changes quickly. 2. It is easy to change procedures in our unit to meet new conditions. 3. Getting anything changed in our unit is a long, time-consuming process.</p>	Strongly disagree 1 2 3 4 5 6 7 Strongly agree
CPORC	S - Organizational Readiness 1-4	<p>1. I believe SyMO^a can be successfully implemented in our unit. 2. Managers should delay the deployment of SyMO in our unit (reversed item). 3. The deployment of SyMO in our unit is timely. 4. Our unit is ready to take on this technological change.</p>	Strongly disagree 1 2 3 4 5 6 7 Strongly agree
TransforMED - MHVSA	S - Change Management, Q12	Does your practice have the resources and existing infrastructure to commit to planning, managing change, and training employees to adapt to change?	<input type="radio"/> Yes / <input type="radio"/> No
TransforMED - BPS	S - Application Questions, Q95	What do you anticipate will be the most difficult challenge your practice will have in implementing the New Model?	

^a Un outil informatisé de planification et de suivi de la clientèle.

7. CONTEXTE ORGANISATIONNEL

7.1 CARACTÉRISTIQUES DÉMOGRAPHIQUES

Cette catégorie comprend les détails liés aux caractéristiques de la population et des patients desservis par la clinique. Une distribution est effectuée en fonction de l'âge, du sexe, du groupe ethnique et des déterminants spécifiques à la santé de la population. Les statistiques concernant les besoins particuliers en matière de soins de santé et les questions liées à la santé publique identifiées chez la population et les patients de la clinique font également partie de cette section.

Questionnaire	Section/ question #	Questions ou items	Échelles de réponse
Contexte organisationnel / Caractéristiques démographiques / Taille de la population de pratique			
TransforMED - BPS	S - Practice Demographics, Q8	Size of the community in which your practice is located:	<input type="radio"/> <5,000 not within 25 miles of a major city / <input type="radio"/> <5,000 within 25 miles of a major city / <input type="radio"/> 5,000 – 10,000 not within 25 miles of a major city / <input type="radio"/> 5,000 – 10,000 within 25 miles of a major city / <input type="radio"/> 10,001 – 25,000 not within 25 miles of a major city / <input type="radio"/> 10,001 – 25,000 within 25 miles of a major city / <input type="radio"/> 25,001 – 100,000 / <input type="radio"/> 100,001 – 500,000 / <input type="radio"/> 500,000
QUALICOPC	S - Your practice, Q5	What is the (estimated) size of your practice population? If you do not have a formal list, please estimate the number of people that normally rely on you for primary medical care (in a joint practice: estimate your share of the population).	Number of patients: _____

IMEPHC	S3, Q3	Please indicate what percentage of your population is registered / roistered.	_____ %
IDCP2D - TIS	S - Practice Demographics, Q4	What is the patient list size for your practice?	
NPS2010	SD, Q14c	Approximately how many patients are in your practice?	_____ patients or o NA
Contexte organisationnel / Caractéristiques démographiques			
NATMEDCA - Practice Q.	S - Patient Demographics, Q12	Please indicate the approximate percent of your patients that fall into the following gender categories. Source of estimates: (1=EMR, 2=billing data, 3= best guess)	<ul style="list-style-type: none"> • Female: _____ % • Male: _____ %
NFPWS2001	S-Practice Profile, Q7	Approximately what proportion of your patients is female?	_____ %
TransforMED - BPS	S - Patient Demographics, Q13	Please indicate the approximate percent of your patients that fall into the following age categories. (Must total 100%.) Source of estimates: (1=EMR, 2=billing data, 3= best guess)	<input type="radio"/> Under 3 years / <input type="radio"/> 3-17 years / <input type="radio"/> 18-24 years / <input type="radio"/> 25-44 years / <input type="radio"/> 45-64 years / <input type="radio"/> 65-74 years / <input type="radio"/> 75 years & older
PCPSS	Q15	Approximately what percentage of the patients seen at your practice site are younger than 18?	<input type="radio"/> Less than 10% / <input type="radio"/> 10-25% / <input type="radio"/> 25-50% / <input type="radio"/> More than 50%
NSPOII	SA, Q9	Is your IPA's patient population mainly adult, mainly pediatric, or both?	<input type="radio"/> Mainly adult / <input type="radio"/> Mainly pediatric / <input type="radio"/> Both
IDCP2D - TIS	S - Practice Demographics, Q5	What is the % of patients on this list who are >65 years of age?	

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
TransformED - BPS	S - Patient Demographics, Q14	Please give the approximate percentage of your patients in the following racial categories. (Must total 100%)	<input type="checkbox"/> White / <input type="checkbox"/> Black / <input type="checkbox"/> African American / <input type="checkbox"/> Native American, American Indian / <input type="checkbox"/> Alaska Native / <input type="checkbox"/> Asian or Pacific Islander / <input type="checkbox"/> Other
TransformED - BPS	S - Patient Demographics, Q15	Please indicate the approximate percentage of your patients that are of Hispanic/Latino ethnicity	
QUALICOPC	S - Your practice, Q6	To what extent do you think your practice population deviates from the usual national level with respect to the following categories: 1. Elderly people (over 70 years) 2. Socially deprived people 3. Immigrants	<input type="checkbox"/> Below average / <input type="checkbox"/> Average / <input type="checkbox"/> Above average / <input type="checkbox"/> Don't know "
IDCP2D - TIS	S - Practice Demographics, Q6	What proportions of the patients registered with your practice are: How often do you need to use interpreters?	<input type="checkbox"/> White British / <input type="checkbox"/> Black British / <input type="checkbox"/> British Asian / <input type="checkbox"/> British Chinese / <input type="checkbox"/> British Other ethnicity / Non-British
NPS2010	SE, Q16	Please indicate if you care for the following. (<i>Please check all that apply.</i>) • Neonates (<1 month) / • Infants (1-12 months) / • Children (1-11 years) / • Adolescents (12-19 years) / • Women / • Pregnant women / • Men / • Aged 65-74 / • Aged 75 – 89 / • Aged 90 and over / • Aboriginal peoples / • Ethnic minorities / • Recent immigrants / • People living in poverty / • Homeless / • Street Involved / • Gay/Lesbian/Bisexual/Transgender / • Transient/seasonal populations / • Patients with hypertension / • Patients with diabetes / • Patients with heart disease/conditions / • Patients with mental illness / • Patients with obesity / • Patients with cancer / • Patients with neurological conditions / • Patients with respiratory conditions / • Patients with HIV/AIDS / • Patients with addictions / • Patients with permanent physical disabilities / • Other, please specify:	<input type="checkbox"/> I provide health care for these patients <input type="checkbox"/> This patient population represents more than 10% of my practice population"
NPS2010	SH, Q23 Part 1	Please indicate which of the following factors are increasing the demand for your time at work. (<i>Check all that apply.</i>)	<input type="checkbox"/> Aging patient population / <input type="checkbox"/> Increasing complexity of patient caseload / <input type="checkbox"/> Management of patients with chronic diseases/conditions / <input type="checkbox"/> Increasing patient expectations
PCOS-NS	S2, Q9	Does the population served by your primary health care organization have unique cultural and/or racial characteristics or spiritual needs? If yes: (i) In what ways is the population unique?	<input type="checkbox"/> No, the population is typical of the province <input type="checkbox"/> Yes, the population is unique culturally
		(ii) Does your primary health care organization have a good understanding of how the cultural qualities of the population impact their health care needs?	<input type="checkbox"/> Yes, we monitor these needs through: <input type="checkbox"/> No, we need to:

7.2 ENVIRONNEMENT ORGANISATIONNEL ET INTÉGRATION DE LA PRATIQUE

L'environnement organisationnel définit le contexte médical. Les éléments comme la distance entre les infrastructures de soins de santé, la présence de programmes de santé qui coordonnent les différentes institutions, la présence d'une faculté de médecine, de même que l'existence de liens officiels ou non officiels entre les organisations au niveau de la communauté sont inclus dans cette catégorie.

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
Contexte organisationnel / Environnement organisationnel et intégration de la pratique / Environnement organisationnel			
NATMEDCA - Practice Q.	S -Site information, Q24a	What is the geographical location of the practice?	<input type="checkbox"/> Large city (>500k pop.) / <input type="checkbox"/> City (100-500k pop.) / <input type="checkbox"/> Town (30-100k pop.) / <input type="checkbox"/> Small Town (<30k pop.)
NATMEDCA - Practice Q.	S -Site information, Q24bc	b. Is the practice in a rural location? c. If yes, what is the rural ranking score?	<input type="checkbox"/> b. Yes / <input type="checkbox"/> No (If no, go to question 25) <input type="checkbox"/> c. _____ score (see enclosed rural ranking score sheet)
NATMEDCA - Practice Q.	S -Site information, Q25	Is the practice in the central business district?	<input type="checkbox"/> Yes / <input type="checkbox"/> No
QUALICOPC	S - Your practice, Q4	How would you characterise the place where you are currently practicing?	<input type="checkbox"/> o Inner part of a big city / <input type="checkbox"/> o Suburban or outskirts of big city (smaller) town / <input type="checkbox"/> o Mixed urban-rural / <input type="checkbox"/> o Rural
IDCP2D - TIS	S - Practice Demographics, Q1	Is the location of your practice urban or rural?	<input type="checkbox"/> o Rural / <input type="checkbox"/> o Urban
ISPCD	Practice Profile and Demographic Data – Q35	Where is your practice located?	<input type="checkbox"/> o City / <input type="checkbox"/> o Suburban / <input type="checkbox"/> o Small town / <input type="checkbox"/> o Rural
NPS2010	SC, Q7b	With respect to your MAIN patient care setting specified in 4b, describe the population PRIMARILY served by you in your practice. (Please check only one.)	<input type="checkbox"/> o Small town / <input type="checkbox"/> o Inner city / <input type="checkbox"/> o Rural / <input type="checkbox"/> o Urban/Suburban / <input type="checkbox"/> o Geographically isolated/Remote / <input type="checkbox"/> o Cannot identify a primary population / <input type="checkbox"/> o Other: <input type="checkbox"/> o Increasing administrative workload/paperwork <input type="checkbox"/> o Lack of availability of local/regional physician services in my specialty <input type="checkbox"/> o Lack of availability of local/regional physician services in other specialties <input type="checkbox"/> o Lack of availability of other local/regional health care professional services <input type="checkbox"/> o Medical liability concerns <input type="checkbox"/> o Other, please specify: <input type="checkbox"/> o None of the above
NPS2010	SH, q23 part2	Please indicate which of the following factors are increasing the demand for your time at work. (Check all that apply.)	
NFPWS2001	S - Access to care, Q24	Please rate the situation regarding availability of medical care services within your practice community:	<input type="checkbox"/> o No problems / <input type="checkbox"/> o Minor problems / <input type="checkbox"/> o Moderate problems / <input type="checkbox"/> o Severe problems

Questionnaire	Section/question #	Questions ou items	Échelles de réponse
COMP-PC	S1, Q4	<p>To better understand the community that you are serving, please indicate the types of institutions/professionals servicing your community, and record the distance from the nearest one to your practice site. (<i>Please check for each category.</i>)</p> <ul style="list-style-type: none"> • Hospital (any community or secondary hospital) / • Tertiary hospital (University/Referral Hospital) / • Nursing home (residence or long term care) / • Walk in clinic / • Community Health Centre / • Community Care Access Centre / • Other family practice office(s) / • Laboratory (e.g. for blood work) / • Imaging centre (e.g. chest X-ray & Ultrasound) / • Dietitian / • Psychologist / • Social Worker / • Physiotherapist / • Occupational Therapist / • Pharmacist / • Chiropodist 	<p>Distance:</p> <ul style="list-style-type: none"> <input type="radio"/> In our practice <input type="radio"/> Same Building (but not our practice)* <input type="radio"/> o < 1 km <input type="radio"/> o 1-5 km <input type="radio"/> o 6-10 km <input type="radio"/> o >10 km <input type="radio"/> o Don't Know
IMEPHC	S2, Q1	<p>Programs (e.g. offered at a community centre or hospital):</p> <ul style="list-style-type: none"> • Diabetes clinic / • Smoking cessation / • Self management / • Mental health 	*In the same building, but not offered by our practice
QUALICOPC	S - Practice location, Q30	<p>What is the distance by road from your (main) practice building to:</p> <ul style="list-style-type: none"> • The nearest GP practice (not in your group or centre) • The nearest consultant/outpatient clinic (independent or part of hospital) • The nearest general or university hospital 	<ul style="list-style-type: none"> <input type="radio"/> In the same building / <input type="radio"/> Less than 5 kms / <input type="radio"/> 5-10 kms / <input type="radio"/> 11-20 kms / <input type="radio"/> More than 20 kms "
Evolution	SD, Q4	In the building where your clinic is located, are there other primary healthcare medical teams or other general practitioners who are not part of your clinic?	<ul style="list-style-type: none"> <input type="radio"/> Yes / <input type="radio"/> No
Contexte organisationnel / Environnement organisationnel et intégration de la pratique / Intégration de la pratique			
BEACH - GP	Q18	Are any of the following services located / available on the premises? (Includes services in the same building or within 50 meters, available on a daily or regular basis). (<i>Circle all that apply.</i>)	<ul style="list-style-type: none"> <input type="radio"/> Physiotherapist / <input type="radio"/> Psychologist / <input type="radio"/> Pathology lab / collection centre / <input type="radio"/> Imaging / <input type="radio"/> Specialist / <input type="radio"/> Other (specify) / <input type="radio"/> None
TransforMED - BPS	S - New Model Characteristics, Q82	Engagement with community resources or service to community	<ul style="list-style-type: none"> <input type="radio"/> Currently use / <input type="radio"/> Considering using / <input type="radio"/> Previously used / <input type="radio"/> If community resources are utilized, please specify_____
TransforMED - PEC	S - Attention to Fitness Landscape - Connection to Community, Q57-59	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>57. This practice is aware of community resources that are accessible to patients.</p> <p>58. This practice works effectively together as a team with community organizations.</p> <p>59. People in this practice are connected with community organizations that serve patients.</p>	<ul style="list-style-type: none"> <input type="radio"/> Strongly disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree "
TransforMED - PEC	S - Attention to Fitness Landscape - Connection to Health System Q61-62	<p>Please indicate how strongly you agree or disagree with each statement :</p> <p>61. This practice works well together with the health care system.</p> <p>62. People in this practice are connected to people in other practices.</p>	<ul style="list-style-type: none"> <input type="radio"/> Strongly disagree / <input type="radio"/> Disagree / <input type="radio"/> Neutral / <input type="radio"/> Agree / <input type="radio"/> Strongly Agree "
TransforMED - BPS	S - Practice Information, Q48	How would you describe the level of competition among practices in your local market?	<ul style="list-style-type: none"> <input type="radio"/> High competition / <input type="radio"/> Moderate competition / <input type="radio"/> Low Competition / <input type="radio"/> No competition
NSPOII	SA, Q10	Does your IPA have a significant relationship with an integrated delivery system or a physician hospital organization?	<ul style="list-style-type: none"> <input type="radio"/> Yes / <input type="radio"/> No
