# Temporary Foreign Workers
## Practical Information for Employers

Mesures de prévention de la COVID-19 en milieu de travail – Recommandations intérimaires

## Protect temporary foreign workers (TFWs) from COVID-19 and prevent outbreaks!

<table>
<thead>
<tr>
<th>Before the TFWs arrive</th>
<th>During the stay</th>
</tr>
</thead>
<tbody>
<tr>
<td>Provide any important information about the TFWs you will be hosting (name, contact information, number, length of stay, where they will be staying and working, etc.)</td>
<td>To request support of any kind</td>
</tr>
</tbody>
</table>

### Check symptoms

- Upon arrival at the airport
- Before and during transportation
- During preventive isolation (quarantine)
- Every day at work
  - [See the screening questionnaire](#)

### Protect workers

- By respecting the hierarchy of measures and informing workers of the measures in place
- By providing personal protective equipment
- By isolating workers who have symptoms, have COVID-19, or have been in contact with a confirmed case

### Provide COVID-safe transportation upon arrival in Canada

- By providing separate transportation to each farm
- By not transporting sick workers
- By ensuring workers sit two metres apart or wear good quality medical (procedural) masks

### Organize housing to prevent outbreaks

- By having workers quarantine separately upon arrival
- By creating separate zones so sick or symptomatic workers have no contact with others

Québec
Reminder:
If a worker gets sick, all of their coworkers and housemates may have to be isolated. These preventive measures are aimed at protecting the health of all workers so companies can continue to operate during the COVID-19 pandemic while respecting workers’ rights and freedoms. Employers are responsible for providing accommodations and working conditions that make it possible for TFWs to comply with these measures. TFWs are responsible for complying with these measures.

Housing divided by zone to separate healthy workers from contagious or potentially contagious workers

As much as possible, make sure there is no contact between workers in different zones. Ideally, TFWs in different zones should be in separate buildings, or at least in separate wings.

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

Eligible workers
- Have completed the 14-day quarantine after arriving in the country;
- Have no symptoms of COVID-19;
- Do not meet the criteria of the other zones.

EITHER:
- Are in preventive isolation (quarantine) having just arrived in the country and do not have any symptoms of COVID-19;
- Have been in close contact (high or moderate risk) with a confirmed case, but have no symptoms of COVID-19 (see info sheet on contact tracing, in French only)

Have developed symptoms of COVID-19, awaiting test results.

- Have tested positive for COVID-19.

<td>Isolation (for quarantine or contact with a known case), has symptoms, awaiting test result</td>
<td>COVID-19 cases (people who tested positive)</td>
</tr>
</tbody>
</table>

- **Isolation**
  - **No**
  - Yes, in their room:
    - For 14 days in preventive isolation (quarantine) upon arrival in the country;
    - or
    - For 14 days following the last exposure with a confirmed case (close contact at high or moderate risk) regardless of the test result, if they got tested.
  
- **Yes**
  - If the test is positive: **Transfer to the hot zone**
  - If the test is negative:
    1) Preventive isolation (quarantine) or if they were in contact (moderate or high risk) with a case: **end the 14-day isolation period**.
    2) If the first point does not apply and symptoms persist: **medical assessment**.
    3) If the first point does not apply and symptoms have resolved: **transfer to cold zone** if worker has no fever for 48 hours without medication and symptoms have improved for at least 24 hours.

- **Room occupancy**
  - Maximum 2 workers per room with 1 bed per person, foot to foot so workers' heads are at opposite ends (no bunk beds, 9 square metres of personal space).
  - 1 worker per room
  - 1 worker per room
  - 1 worker per room

---

1. See government guidelines for cases.
2. If a worker is a suspected or confirmed case of COVID-19 living in a two-person room and cannot transfer to a single room right away, install a physical barrier (e.g., privacy curtain) between the beds until the worker can be transferred.

</tbody>
</table>

³ Arrangements for testing (bring in a mobile unit or make appointments): procedures vary depending on the administrative region and the number of TFWs to be tested.

⁴ With the exception of small cohorts allowed in regions on green alert level (max. 6 TFWs who live, travel, and work exclusively together).

⁵ Ideally, masks should comply with the American Society of Testing and Materials (ASTM) criteria, F2100 standard. Type IIR masks (EN 14683 standard) can also be used.

**Access to outdoors**
- At all times, two meters apart from others.
- Ideally, with a designated space for each small group (avoid gatherings).
- Yes, possible and preferable:
  - One worker at a time, no contact with others.
  - Workers must wear a good quality medical (procedural) mask to get outside but may remove it once they are outside alone.
  - On the grounds of the accommodations only (no community outings).

**Signage**
- General guidelines posted at all times in the languages spoken by TFWs.
- Post applicable measures at the entrance and in strategic locations in the zone (e.g., bathroom, kitchen, etc.).

**Personal protective equipment (PPE) for TFWs**
- Workers must wear a good quality medical (procedural) mask anytime they leave their room (e.g., bathroom, shower, outdoors).
- Good quality medical (surgical) mask when going outside (must stay on the grounds).

**PPE for other workers who enter the accommodation facilities**
- Good quality medical (procedural) mask AND eye protection all times.
- Good quality medical (procedural) mask AND eye protection (goggles with side protection or face shield) AND overclothes (gown or smock) AND disposable gloves.

**Sharing items**
- Disinfect after each use.
- Not allowed.
- Not allowed.
- Allowed.

**Disinfection of high-touch surfaces in restroom facilities**
- At least once a day.
- After each use.
- After each use.
- After each use.

**Disinfection of high-touch surfaces in common areas**
- At least once a day.
- Access prohibited.
- Access prohibited.
- At least once a day.

**Cleaning and disinfection of rooms**
- At least once a day for high-touch items.
- Provide workers with the necessary products to do it themselves before they leave.
- After they leave:
  - Close the door to the room.
  - If possible, open any outside windows to increase air circulation in the room.
  - Wait a minimum of three hours before cleaning and disinfecting the room.
